Anti-Fingerprint – A surface like no other

Description

The Anti-fingerprint is obtained by laminating a special acrylic film with various layers of Kraft impregnated paper as a support, chosen according to the required thickness.

Thanks to a special technology, the acrylic surface acquires extraordinary properties such as: anti fingerprint, high scratch resistance, light fastness, no bacterial proliferation, high resistance to solvents and chemical reagents. These technical features, joined with its soft and supermatt surfaces, make our movable walls a cutting-edge product in the world of interior design appreciated by architects and designers.

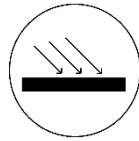

Features

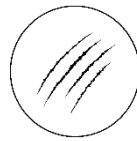

Anti-Fingerprint

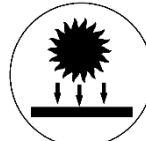

Soft Touch

Low reflexion

Scratch-resistant

Light fastness

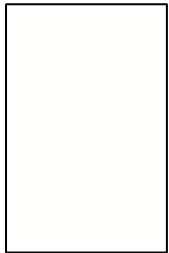

moisture resistant

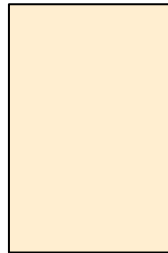

Anti-Microbial

supermatt black

Advantages

- ✓ Elegant, sleek with a contemporary matt finish
- ✓ Timeless design
- ✓ This mobile partition surface is easy to use in harmony with other materials in your space
- ✓ Quick and easy cleaning of the movable partition (time and cost savings)
- ✓ The white surface is also projectable

Cleaning and maintenance

In the case of stains or grease on the surface, a soft cloth should be used for cleaning, preferably in microfibre, soaked in hot water or wet with a product suitable for cleaning surfaces.

For the maintenance of, you can also use a damp sponge (in melamine foam), suitable for cleaning and surfaces regeneration.

What to avoid:

abrasive sponges or unsuitable tools, such as sandpaper or scouring pad; high acid or alkaline cleaning agents; wax containing detergents, furniture polish
