Zenit

The highlight of modular series

Zenit is the most comprehensive modular range for all kind of homes and commercial facilities. A number of appreciated designs and beautiful finishes that add value to the facility, with advanced features that provide greater comfort and performance level. With Zenit you can make any type of installation enjoy technical advances that make it easier and faster. This range has the guarantee of a brand renowned for its quality such as ABB.

The top in design and performance

For its aesthetics and details

Simple, elegant, the top in design.

Zenit is born with a high-rise design. With rectilinear lines, very trendy finishes and full of details that enhance its aesthetics. It reaches the highest levels in quality and infinite values.

Eco-design

The Zenit switch range has been designed following the Product Design and Development Environmental Management regulations: Eco-design.

Wide range

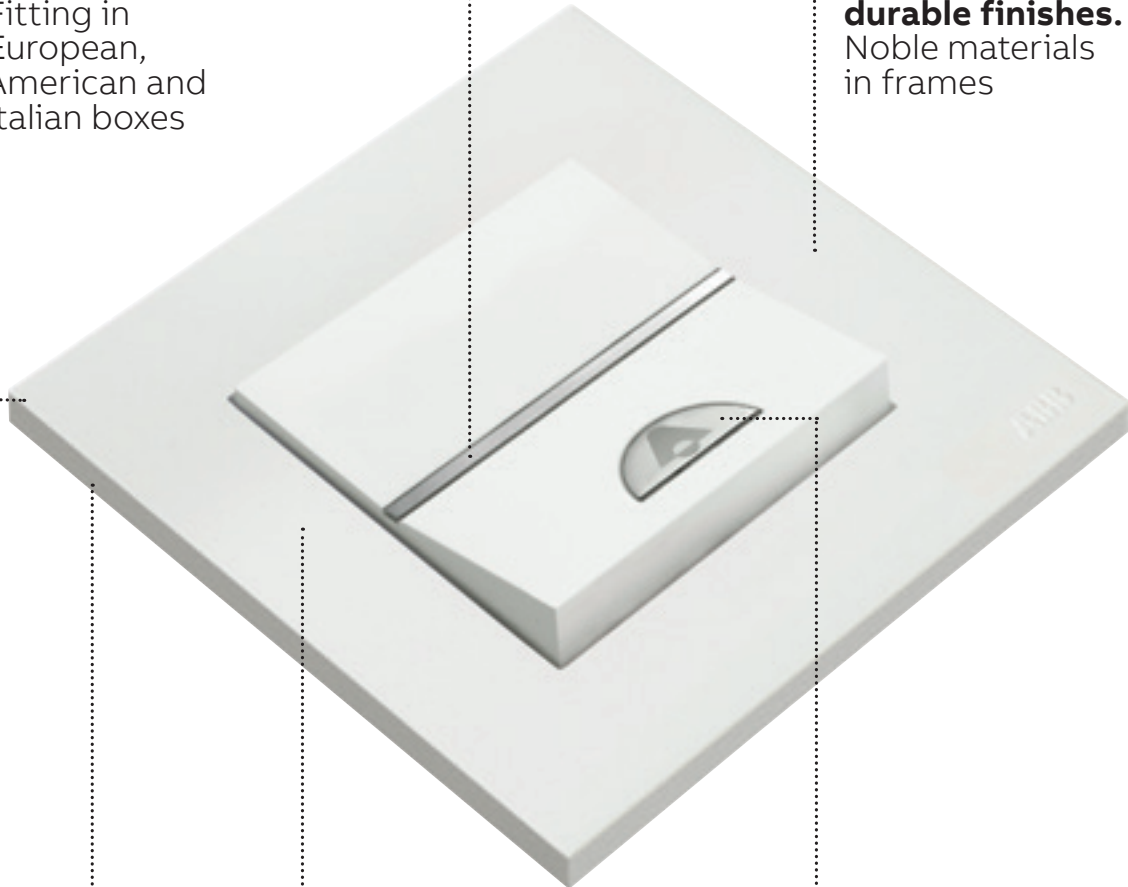

• **Display and styling trim**
Lighting in green styling trim in Chrome, Anthracite, White and Champagne

• **Multi-standard**
Fitting in European, American and Italian boxes

• **High-quality and durable finishes.**
Noble materials in frames

• **Frames with two shapes**
Floating effect frame. Solid effect frame.

• **More than 100 functions**
in four finishes

• **Symbols with backlight**

The top in residential

To bring the comfort to all the family

Never before has your home been so comfortable, safe, efficient and beautiful.

Today's modern living spaces demand comfort in every room, whether it's the bathroom transforming into a wellness spa or kitchens becoming communication islands.

Zenit offers solutions for future-oriented lifestyle in residential living environments.

Zenit & ABB-free@home®

Making home automation easier than ever.

Simply smart. Zenit and ABB-free@home® transform the house or the apartment into an intelligent home. Whether it's blinds, lights, heating, air conditioning, door communication or scenes. Easy to remote control via a switch on the wall, with the laptop or with the smartphone. Very convenient. Extremely comfortable. Very energy efficient. Especially attractive: Only minimal costs are involved when compared with conventional electrical installations.

Sound system

Music stirs the emotions. At any location. A flexible and convenient audio system for entertainment and communication. Its high-quality components impress with the utmost in functionality, intuitive operation and innovative design. In combination with the practical accessories it is a unique range of high-performance products that offers individual solutions for every application.

Management of blinds

The blind management range opens new dimensions for the private housing construction sector. You can now enjoy greater living comfort, safety and economic efficiency in your house. The blind management system is suitable for controlling all motor-driven blinds, roller blinds and awnings. Its many options for application, connection and setting make it the ideal solution for every housing situation.

LED dimmers

Always the perfect light. Beautiful music, a glass of wine, a soft sofa. What makes this even more perfect now is pleasantly subdued and colourful illumination. The innovative and elegant dimmer units with their soft reduction of the volume of light create an intimate, cosy atmosphere. They offer the possibility of creating the kind of illumination that suits the mood and the occasion. And they add a special kind of magic to those intimate moments.

Multimedia connectivity

Communication is the gateway to the world. Enjoyable entertainment! The new VDI connectors are suitable for multimedia devices in your home. All conventional connectors are supported: double and triple RCA, Mini-Jack, VGA, HDMI and USB.

All weather IP55

Do not worry about the weather. IP55 boxes and frames for flush and surface mounting that allows installing any device in outdoor environments.

USB charging devices

The end of overfilled multiple socket outlets has arrived. The USB charging devices are the ideal location for charging mobile telephones, tablets or smart watches.

The top in hospitality

To make guests feel at home

All factors are working together for design and comfort. Take comfort to new heights. Hotel guests are demanding. The design is just one aspect. What's particularly important is the light, blinds, air conditioning and heating work together to create an atmosphere where your guests enjoy every second of their stay and look forward to returning.

Zenit & ABB i-bus® KNX

Perfect climate

A perfect hotel room is never too warm, never too cool and always filled with fresh air – it stimulates all of your senses. The invisible technology, ABB i-bus® KNX, makes this possible. Everyone can get to grips with it straight away thanks to the room temperature controller with its clear design. As a result, you can control the heating, ventilation and air conditioning with the touch of a finger and a glance at the display – it's as simple and clear as that.

Measurable efficiency, all costs under control

Comfortable cost reductions. You don't always have the same number of people staying in a hotel room. This is why it is important to adjust the resources to the use in order to increase efficiency. Intelligent presence detectors with a direct KNX connection adjust the indoor climate and light sensitively. With their extensive coverage and discreet design, they blend seamlessly into the architecture – almost invisible but highly effective.

Maximum safety for guests and investments

More than a feeling. Intelligent technology is behind all that is safe. Only a fully networked building creates an environment which protects the people and values. The ABB i-bus® KNX brings everything together. By integrating all applications, the result is stability for everyone.

Multimedia center

Hotel guests can enjoy their own taste in music. The sound comes directly from the wall, without a tangle of cables. It is possible to connect a smartphone via both Bluetooth and at the same time charge it or connect the laptop to the TV via the HDMI connector. Therefore all the technology can fit in a saving space module housing in line with the interior design – ideal for the space next to the bed or in the desk. Sound contributes to comfort.

Card switch

A friendly welcome. Perfection begins at the room door with the card switch. If you insert the card here, a light scene switches on automatically. The temperature is regulated immediately. The room itself says "welcome"!

Do not disturb / Make-up room

Always tidied up, rest without interruption. The integrated DND/MUR switch and LED signaling light indicates to the service personnel whether the guest wishes to not be disturbed or for their room to be made up.

Signaling and beacon lights

Clear orientation. Guests appreciate the superior welcome they experience through clear signals. The signaling labels help them to get their bearings. These pictograms provide information during the day and night, and which show the way. With LED technology and high-quality diffuser really emphasize the contemporary features.

Movement detector

Constant vigilance. Safety begins with visibility. The movement detectors react sensitively and immediately. They ensure that no one has to stumble around in the dark. With a detection range of up to 110°, we have a suitable movement detector integrated with the interior design for corridors, rooms or common areas.

The top in the office

To make the working time easier

The perfect working environment helps a business grow and develop. Zenit can provide the best in office space planning, from light and temperature control, workstations, ABB i-bus® KNX and free@home automation to everything in between. From medium sized businesses to large corporations, we can provide designs in any modern finish or material to suit the needs of any interior decoration.

Workstations

Power, voice, image and data in one connection point

In an office the number of workplaces that require being connected to computers and multimedia equipment is increasing. This system makes it possible to group all together the needs of a working place (electrical outlets, telephone, data, protection and multimedia) in a single box.

The Zenit workstations have been meticulously designed with innovative breakthroughs, devised to solve any installation in the most comfortable, quick and easy way.

Multimedia and data connectivity

Voice, data and image are part of the nowadays working environments. Zenit offers a wide number of devices that can solve any need in terms of connectivity: 2x RCA, 3x RCA, Mini-Jack, VGA, HDMI, USB, RJ-11, RJ-12, RJ-45 Cat.5E, 6, 6A, UTP, FTP, STP and SC/APT fiber optic adapters.

ABB i-bus® KNX

Rooms with intelligence. Modern building automation has become more efficient than ever in order to meet the many demands of people working in the building. Adaptable systems turn the modern functional building into a smart building. They create an environment in which communication and creativity can freely express themselves. Ideal for efficiency, perfect for the future.

Double pole switch

Offices are spaces with full activity during the whole day. This frenetic activity requires the intensive use of electrical devices. The double pole switches are specially designed to control the biggest loads of the electrical installation, such as the lighting of common areas, signaling panels, cooling and heating devices, etc.

Dimmers for drivers

Always the perfect light in the meeting room. Full luminosity during the meeting, low light during a presentation. Dimmers for drivers are able to manage any lamp with a 1-10 Vdc input.

Sound system

Webinars, video conference, on-line presentations... Many times a group of people is sharing a screen to participate in this type of meetings. These meeting rooms used to have a video system that can be shared, but what about the audio? Zenit's Sound System offers a perfect solution to share the audio of the laptop, tablet or mobile phone to all the audience in the room. Without cables, without auxiliary devices. Just connecting the laptop to the sound system via Bluetooth.

The top in commercial spaces

To maximize customer experience

From a coffee shop to a modern mall. From the terrace to fitting room. From simple command centralizations to the most innovative ABB i-bus® KNX automation systems. Zenit and ABB solutions can transform the customer experience in any commercial environment. Design and functionality are key to creating a pleasant atmosphere, managing in the right way lighting and temperature, while keeping the wiring devices integrated in the overall decoration of the space.

Centralizations

Centralized control system

The systems for centralized control of Zenit are oriented to respond to the needs generated in facilities of the tertiary sector. In most of the tertiary installations, a place to centralize the control of the various lights, shutters, boilers, etc. is always required. The systems for centralized control of Zenit allows to group all these functions in a single box using the covers and inserts of most complete modular range of the market: Zenit.

ABB i-bus® KNX. The perfect ally for big commercial areas.

Lighting and climate control are key to operating and maintaining commercial buildings such as big shopping malls. Balancing energy consumption and efficiency is the basis of a perfect customer experience and is important to stay profitable. ABB i-bus KNX is the intelligent installation system that meets the highest requirements for applications in modern building control and is based on the simple and proven KNX technology, which is accepted as the world's first open standard for the control of all types of intelligent buildings - industrial, commercial or residential.

ABB-free@home® - The perfect partner for small shops, clinics, agencies or any small tertiary.

Free@home offers an endless number of possibilities for creative design. This allows the small commercial to be equipped in line with endless personal concepts and preferences. Both today and in the future. Easy to use and maintain, Free@home can be easily managed by the owner without requiring special trainings. Maximum comfort and energy saving. Automation is the gateway to improve the customer experience by doing the right control of lighting and temperature and this is now also possible in small size commercial businesses thanks to ABB-free@home®.

Sound system

Hair salon, coffee shop, clothing store or dental clinic. All of them have in common the music. The music helps the customer to feel comfortable in the store while they are cutting the hair, taking a cup of tea, buying a shirt or waiting his turn in the waiting room. Zenit's Sound system is specially designed to meet any of the needs in these spaces, being easy to use and requiring simple installation.

Key switch

Protection against unauthorized access. The blind key switch/push-button prevents unauthorized operation of the electric drives. At home, it is suited as a "parental lock" and, at work, it prevents unauthorised persons from gaining access. Three different functions are available: key switch 1-way with 2 positions, key switch 2-way with 3 positions and a key push-button 1-way with 2 positions and automatic return to position 1.

All weather and surface solutions

Four options that cover any need in flush, surface and/or all weather installations. Zenit IP20 surface mounting boxes are the solution for a surface indoor installation keeping the aesthetic appearance in the store. Zenit IP40 boxes to give an industrial looking decoration inside the shop or if a surface solution in an indoor parking is needed. Zenit IP55 frames for flush mounting is the perfect ally to install a switch in the terrace of a bar, but mimicked with the furniture. Zenit IP55 surface mounting boxes will help in the installation of any device if the outdoor electrical installation is surface mounted.

Signaling and beacon lights

Zenit's signaling lights informs and discreetly provides clear orientation. A special field with a backlit pictogram marks the toilet, indicates smoke-free zones or provides information about special treatment rooms. Zenit's signaling lights are helpful everywhere. With a sufficient brightness (of two lux), Zenit's beacon light is ideal for lighting special danger points in dark areas. Particularly comforting: in case of a power failure, it is switched over to battery operation for up to three hours. The LEDs then maintain the lighting. For example, in stairwells or in cellars.

Functions for all spaces

Zenit can be installed everywhere, in spaces that require new solutions, with new applications and all installation facilities.

Up to 40% savings

- Contacts with an automatic connection terminal providing ease and up to 40% savings in installation time.
- The Zenit rocker mechanisms are 16 A and they offer top quality with a reduced number of reference to stock.
- More robust and compact mechanisms to be inserted from the front.
- Designed to hold the switches firmly avoiding balancing problems.
- They have reduced depth, only 21 mm, which allows more connection space for wires.
- With larger press clamps and smoother to make the automatic connection more comfortable and safer.
- They have been manufactured with high quality and recyclable material.

More protection

- Children are really curious and get excited with any dangerous device available at home, especially those that are at the height of socket outlets.
- All Zenit socket outlets are equipped with shutters for child protection, protecting the live parts from electric shock.

More benefits

- Galvanized steel mounting plates with unique anti-corrosion treatment with top and bottom nerves for a rigid positioning of the mechanism.
- The mounting plate is supplied separately from the frame in order to create the atmosphere you want.
- Zenit mechanisms are designed so they can be removed from the front.
- Galvanized steel metal mounting plate to ensure the durability of the installation.

Less consumption

- The covers are easily removed to change the lighting pilot facilitating the installation from the front.
- In Zenit we have replaced our traditional neon pilot for a LED located in the horizontal display that emits a diffused light; it looks more attractive; it consumes less energy and lasts 10 years.

Automatic connection

1. Strip the cable about 14 mm. and introduce it into the terminal.

2. Press the push button and insert the cable.

3. Release the push button and check fixation. To disconnect the cord, press again the push button on top and bottom.

Easy and intuitive installation system, providing maximum values in performance, comfort and functionality

Digital room thermostat - 2M
Rated voltage: 230 Vac / 50-60 Hz.
Power consumption: < 1W.
Operating temperature range: + 0° C to 50° C.
Measurement accuracy: \pm 2° C (\pm 1° C with calibration).
Resolution: 0.1° C.
Control output:
Potential-free relay contacts Normally Open (NO).
Maximum load: 3A cos = 0,5.
Output relay operation modes:
- Hysteresis: 0.5° C.
- Pulse-width modulation: with a \pm 4°C difference with the set-point temperature, variable from 100% to 0% modulation.
To be installed with N2240.5 cover plates.

Flush mounting boxes

Gangs	Modules	Article-No.	Order-No.	Pack/Qty
1-gang	2 modules	1099	2CLA009900A1002	50
 <p>European type box - Bricks and cement Installation box for walls built with bricks or cement. Distance between screws: 60 mm Suitable for mounting plates code: N2271.9, N2271.9G & N2272.9. Allows the input of 2 tubes per each side. Linkable for multigang frames. Included: 2 screws to fix the mounting plate. The screws can be placed in any of the 4 sides to facilitate the installation of the insert in vertical and horizontal.</p>				
1-gang	2 modules	999	2CLA099909A1001	25
 <p>European type box - Drywall and partitions Installation box for walls built with drywall or partitions. Distance between screws: 60 mm Suitable for mounting plates code: N2271.9, N2271.9G & N2272.9. Linkable for multigang frames. Included: 2 screws to fix the mounting plate. Shaft diameter: 68 mm.</p>				
2-gang	2+2 modules	999.2	2CLA099920A1001	10
 <p>European type box - Drywall and partitions Double box suitable for 2-gang mounting plates. Installation box for walls built with drywall or partitions. Distance between screws: 60 mm Suitable for mounting plates code: N2271.9, N2271.9G & N2272.9. Included: 4 screws to fix the mounting plate. Shaft diameter: 68 mm. Distance between centers: 71 mm.</p>				
1-gang	3 modules	499.3	2CLA049930A1002	25
 <p>3 module type box - Bricks and cement Installation box for walls built with bricks or cement. Distance between screws: 83,5 mm. Suitable for mounting plates code: N2371.9 & N2373.9. Included: 2 screws to fix the mounting plate.</p>				
1-gang	4 modules	1499.4	2CLA049940A1002	20
 <p>4 module type box - Bricks and cement Installation box for walls built with bricks or cement. Distance between screws: 107 mm Suitable for mounting plates code: N2374.9. Included: 2 screws to fix the mounting plate.</p>				
1-gang	7 modules	1499.7	2CLA049970A1002	5
 <p>7 module type box - Bricks and cement Installation box for walls built with bricks or cement. Distance between screws: 100 mm Suitable for mounting plates code: N2777.9. Without screws. Included: 4 screws to fix the mounting plate.</p>

 <p>Frame for metallic and plastic profiles Frames suitable to be installed in reduced dimensions surfaces as plastic and metallic profiles or screens. For 1 and 2 module devices. Size (width x height): 54 x 68 mm. Shaft size (width x height): 49 x 50 mm.</p>				

DIN-rail mounting plate

1-gang	2 modules	N2692 BL	2CLA269200N1102	10
 <p>Adapter for DIN rail - 2M Adapter that facilitates the installation of Zenit devices up to 2 modules in switchboards on DIN rails. RAL 9010. Width: 53,5 mm.</p>				

All weather and surface solutions

Zenit boxes and frames for flush and surface mounting.

Four options that cover any need in flush, surface and/or all weather installations.

IP20 surface mounting boxes:

- 1-gang boxes with 2, 3 and 4 modules space.
- Protection degree: IP20.
- Color: White RAL 9010.
- Perfect solution for indoor surface installations combined with pipes and trunking systems.

IP40 surface mounting boxes:

- 1, 2 and 3-gang boxes with 2, 3, 2+2 and 2+2+2 modules space.
- Protection degree: IP40.
- Color: Gray RAL 7035.
- Perfect solution for indoor surface installations requiring a higher level of protection like parkings, industries, stadiums, etc.

IP55 surface mounting boxes:

- 1, 2 and 3-gang boxes with 2, 3, 2+2 and 2+2+2 modules space.
- Protection degree: IP55.
- Color: Gray RAL 7035.
- The box has a cover with a transparent elastic membrane that allows direct control of the switch and a comfortable opening angle of 120°.

IP55 flush mounting frames:

- 1 and 2-gang boxes with 2, 3 and 2+2 modules space.
- Protection degree: IP55
- Color: White, Gray RAL 7035 and Anthracite
- The frame has a cover with a transparent elastic membrane that allows direct control of the switch and a comfortable opening angle of 120°.

IP20 surface mounting boxes

Color	Article-No.	Order-No.	Pack/Qty
	Surface mounting box with frame - 2 modules Surface mounting box for 1 and 2 module devices. The box includes the clipping system to clasp inserts (no mounting plate necessary). Included: frame - 2 modules Size (Width x Height x Depth): 64 x 70 x 47 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	N2991.1 BL	2CLA299110N1102	10
	Surface mounting box - 2M Surface mounting box for 1 and 2 module devices. Suitable for 2 module mounting plates N2271.9. Suitable for N2171 and N2271 frames. Size (Width x Height x Depth): 86 x 86 x 44 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	8591 BL	2CLA859100N1102	6
	Surface mounting box - 2+2M Surface mounting box for 1 and 2 module devices. Suitable for 2 module mounting plates N2271.9. Suitable for N2272 frames. Size (Width x Height x Depth): 157 x 86 x 44 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	8592 BL	2CLA859200N1102	5
	Surface mounting box - 2+2+2M Surface mounting box for 1 and 2 module devices. Suitable for 2 module mounting plates N2271.9. Suitable for N2273 frames. Size (Width x Height x Depth): 228 x 86 x 44 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	8593 BL	2CLA859300N1102	1
	Surface mounting box - 3M Surface mounting box for 1, 2 or 3 module devices. Suitable for 3 module mounting plates N2371.9 and N2373.9. Suitable for N2471, N2472 and N2473 frames. Size (Width x Height x Depth): 107 x 85 x 44 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	N2993 BL	2CLA299300N1102	10
	Surface mounting box - 4M Surface mounting box for 1, 2 or 3 module devices. Suitable for 4 module mounting plates N2374.9. Suitable for N2374 frames. Size (Width x Height x Depth): 139 x 85 x 44 mm. Pre-cut areas in the 4 sides for N2999 adapters.		
White	N2994 BL	2CLA299400N1102	5
	Adapter for tubes/pipes Adapter for tubes of Ø16, Ø20, Ø25. Suitable for surface mounting boxes code: N2991.1, 8591, 8592, 8593, N2993 and N2994.		
White	N2999 BL	2CLA299900N1102	10

IP40 surface mounting boxes

Color	Article-No.	Order-No.	Pack/Qty
	Surface mounting box - IP40 - 2 modules Box for surface installation. 1-gang - 2 modules. For 1 or 2 module devices. Size (height x width x depth): 80 x 65 x 55 mm. Color: gray - RAL 7035. Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20. The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).		
Gray	N3291.1	2CLA329110N1102	10
	Surface mounting box - IP40 - 2+2 modules Box for surface installation. 2-gang - 2+2 modules. For 1 or 2 module devices. Size (height x width x depth): 80 x 130 x 55 mm Color: gray - RAL 7035. Protection degree: IP40 / IK06. Double incoming with multi-diameter cone for tubes/cables max. Ø20. The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).		
Gray	N3292.1	2CLA329210N1102	10
	Surface mounting box - IP40 - 2+2+2 modules Box for surface installation. 3-gang - 2+2+2 modules. For 1 or 2 module devices. Size (height x width x depth): 80 x 195 x 55 mm. Color: gray - RAL 7035. Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20. The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).		
Gray	N3293.1	2CLA329310N1102	5
	Surface mounting box - IP40 - 3 modules Box for surface installation. 1-gang - 3 modules. For 1, 2 or 3 module devices. Size (height x width x depth): 80 x 104 x 55 mm Color: gray - RAL 7035. Protection degree: IP40 / IK06. Incoming with multi-diameter cone for tubes/cables max. Ø20. The box includes the clipping system to clasp inserts (no mounting plate, nor frame are necessary).

Zenit Centralizations and Workstations

Cutting-edge
connectivity

Zenit Centralizations and Workstations is a complete range of electrical and multimedia connectivity systems that allow the electrification of both, spaces and furniture, with solutions for flush or surface installations. With all the guarantee and care design that you can expect from our brand, and with important advances to facilitate and make this type of installations more comfortable.

Systems for centralized controls

The systems for centralized control of Zenit are oriented to respond to the needs generated in facilities of the tertiary sector (offices, shops, hotels, auditoriums, etc.). This system serves to centralize the control of different lights, blinds or equipment in a single box, in a single control point.

Better aesthetics outside, more comfort inside

The Zenit control centralizations can be installed in both, surface and flush mounted boxes.

Plates with four finishes that perfectly combine with all the functionalities offered by Zenit:

- **BL:** White plate and trim.
- **BP:** White plate / Silver trim.
- **PL:** Silver plate and trim.
- **AN:** Anthracite plate and trim.

Also the surface boxes are available in the finishes White, Silver and Anthracite.

Surface mounted box

Flush mounted box

In most of the tertiary installations, a place to centralize the control of the various lights shutters, boilers, etc. is always required.

The systems for centralized control of Zenit allows to group all these functions in a single box using the covers and inserts of **most complete modular range of the market: Zenit.**

With Zenit centralization systems **you can cover all the installation needs** that can arise in this type of premises, from the simplest up to the KNX functions (motion detection, thermostat, lighting control, blinds, etc.), as well as electronic functions as sound systems, dimming, door bell, room temperature control, timer, etc.

Better aesthetics outside and greater comfort inside

Zenit systems for centralized controls allow you to integrate in a single system all functions that an installation may need. All this thanks to having the most complete modular range. A range of appreciated design and beautiful finishes that add value to the installations, with advanced functions that bring greater comfort and level of performance.

With 1 module (N2100) or 2 module (N2200) inserts, you can distribute freely with 3 size options:

- **2-gang:** for 12 one module inserts or 6 two module inserts.
- **3-gang:** for 18 one module inserts or 9 two module inserts.
- **4-gang:** for 24 one module inserts or 12 two module inserts.

The Zenit systems for centralized controls, as well as Zenit Workstations, incorporate the renowned tilting system that simplifies the installation work to professionals.

Allows each window to be tilted, opening it to the right or left. This greatly facilitates the work of connecting or exchanging the inserts, as it does not force you to work inside the box, but comfortably out of it.

Once the connections have been made, with all the facilities offered by the Zenit modular inserts, it will be enough to replace the tilted window in its place by simply pressing on the end until you hear a “click”.

The tilting supports are made of metal to give to the centralization the maximum strength and resistance, and thus guarantee its durability over time regardless of the number of times it is necessary to change its configuration.

Each window includes a comfortable and functional labeling area in its upper part that will allow the end user to identify the function associated to the insert on which it is located.

In addition, Zenit Centralizations offer all kinds of advantages to make the installation simpler and easier (adaptable to any type of wall, flush-mounted boxes with independent frames, systems of comfortable bonding, plates that are mounted by clipping ...).

Systems for workstations

In an office the number of workplaces that require being connected to computers and multimedia equipment is increasing. This system makes it possible to group all together the needs of a working place (electrical outlets, telephone, data, protection and multimedia) in a single box.

Solutions to simplify your work

Standard configuration including 4 double modules consisting of:

- 4 standard duplex Schuko socket outlets,
- 2 UPS duplex Schuko socket outlets,
- 1 quadruple adapter for telephone or data connectors

Finishes suiting to each workspace

The Zenit workstations are available in three finishes:

- **BL:** White plate and trim
- **PL:** Silver plate and trim
- **TT:** White plate / Titanium metallic trim

Also the surface boxes are available in the finishes White and Silver.

Kit especial que incorpora los mecanismos más habituales.

Professional solutions, solutions as a whole

The Zenit systems for workstations allow to group all the needs of a job in a single box, that can be:

- **Surface mounted box,** to be installed with pipe or trunking inlet.
- **Flush mounted box,** for brick walls or drywalls.
- **Floor box,** for traditional or concrete floors, as well as raised or technical floors.

With different options of measurement and capacity, **in order to provide the necessary flexibility in each workstation.**

And the duplex inserts, for sockets, voice and data, specially designed for these boxes, being the most used insert type in this kind of installations.

The maximum simplicity and comfort in the installation

The Zenit workstations have been meticulously designed with innovative breakthroughs, devised to solve in the most comfortable, quick and easy way any installation.

- **1** In addition to the usual cutouts for the drill, the base has flexible flaps for a correct adaptation to non-homogeneous, rough or imperfect walls. It is also equipped with holes arranged horizontally and vertically, to be able to level the box in both directions.
- **2** The bottom has a removable lid with several cutouts for different trunking dimensions.
- **3** Guides at the upper and lower ends facilitate the placement of a metal separator to avoid interferences between power and voice/data lines.

- At the rear the box has a large peripheral space to guide the cables comfortably.
- With multiple cable entries on all sides for easy access to all inserts.

The boxes are linked in a very simple way: the side is cut with scissors, the connection pieces that the box has inside are rotated and these are joined to the other box by simple pressure. This provides a perfect connection that does not alter the design of the box. (Figure 1).

Figure 1

Figure 2

- To facilitate the alignment of the mounting plates, we include an accessory that joins and pairs the ends of the plates while screwing them. (Figure 2).

The boxes are linked very simply with two pieces that serve for the passage of the wiring and to keep them well aligned. (Figure 3).

Figure 3

Figure 4

- The flush mounted box offers multiple tube or pipe inlets on all sides.
- It also has tabs that allow its correct adjustment in plasterboard partitions or drywalls. (Figure 4)

- The mounting plate that holds the inserts is independent of the box. This offers two clear advantages to get a good finish without any problem:
 - When screwing the mounting plate into the flush mounted box, the screw holes allow the frame to be rotated so that the frame is always straight, even if the flush-mounted box is not.
 - In addition, the independent mounting plate rests on the wall and not on the box, which ensures that the outer bezel always fits well, even if the box is not perfectly scratched.

- **1** The embellishing cover and the frame (white or colored) are fixed by pressure, both to the mounting plate and to the box, without using any tool.
- **2** The frame offer easily removable slide-in tags that allow you to insert the labels included with the frame or any necessary description.
- **3** The socket outlets are positioned tilted to facilitate the use of bulky plugs or chargers.
- **4** In addition to the duplex inserts created especially for the workstations, the system has a double adapter that allows to incorporate any modular 1 or 2 module insert of the Zenit range.
- **5** The voice and data connectors are hidden behind a protective shutter that prevents dirt from entering them.

Thus, work is much easier.

- **1** The inserts are installed by clipping, simply by pressing on the top and bottom of them.
- **2** The great advantage for the installation is that, in order to facilitate its connection as much as possible, the inserts swing very easily in both directions (up and down). This allows you to work comfortably outside the box and, once the connections have been finished, reposition them in place by clicking on the bracket.
- **3** The screws of the socket outlets are located at the rear for easier tightening. In addition in the duplex socket outlets it is only necessary to connect on one side, which reduces the time of wiring in half.
- **4** Thanks to this innovative tilting system, the voltage indicator lamp can also be easily replaced by pressure and without the need for additional cables or connections at the rear of the inserts.
- **5** When placing the lamp on a duplex Schuko socket outlet or a duplex French/earth-pin socket outlet the sign is illuminated, which allows to easily identify if there is power supply at that point.

Zenit systems for workstations

Surface mounted workstations for walls and furniture

Surface mounted box with mounting plate + plate with trim + inserts

Selection table	3 columns	4 columns	5 columns
Surface mounting box	T1193 XX	T1194 XX	T1195 XX

Application examples for workstations

- Workstation for wall or furniture
- Surface mounted
- With Zenit's MCB and RCD protection insert

Workstation with 4 columns (Silver) with 3 standard Schuko socket outlets, 2 red for UPS and one support for 4 data/telephone connectors. Composition:

Description	Code
Surface mounting box with mounting plate Silver	T1194 PL
Plate with trim Silver	T1174 PL
Duplex Schuko socket outlet Silver	T1088 PL
Duplex Schuko socket outlet Silver-Red	T1088 RP
Support for 4 data/telephone connectors Silver	T1018.4 BL
Adaptor for Zenit modular inserts	T1000
Zenit Schuko socket outlet Silver	N2288 PL
Zenit MCB (10A)+ RCD (10mA) protection device Silver	N2234.2 PL

- Workstation for wall or furniture
- Flush mounted
- With data and telephone connectors

Workstation with 3 columns (White) with fordable lid, 2 standard duplex Schuko socket outlets, 2 red for UPS, one telephone outlet and data outlet CAT5e UTP. Composition:

Description	Code
Flush mounting box with mounting plate	T1093
Plate with trim White	T1173 BL
Fordable lid	T1173.5
Duplex Schuko socket outlet White	T1088 BL
Duplex Schuko socket outlet Red	T1088 RJ
Adaptor for Zenit modular inserts	T1000
Zenit RJ12 telephone outlet	2017.2
Zenit RJ45 CAT5e UTP data outlet	2018.5
Zenit 1-gang cover plate for telephone and data outlets White	N2218.1 BL (2 units)

- Workstation for floor installation
- With Schuko socket outlets and data connectors

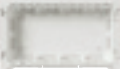

Workstation with 3 columns, 1 standard duplex Schuko socket outlet, 1 red for UPS, one telephone outlet and data outlet CAT6 FTP. Composition:

Description	Code
Floor box with stainless steel lid	T1393.1
Plate with mounting plate	T1373
Duplex Schuko socket outlet White	T1088 BL
Duplex Schuko socket outlet Red	T1088 RJ
Support for 2 data/telephone connectors Silver	T1018.2
Zenit RJ12 telephone outlet	2017.2
TZenit RJ45 CAT6 FTP data outlet	2018.6F

Sound system

A soundtrack in each space

Improve the sound of all your projects. The first sound system that adapts to the current way of listening to music and radio. With Bluetooth and USB input to connect it to your mobile devices, and with Multiroom function to hear one melody in each space or the same in all rooms. Zenit sound system is an innovative solution that thanks to its many advantages you can offer your customers to increase the value of your facilities. With the quality of ABB you already know and with a very simple installation that does not require work.

Music from any device

Each person has his own musical universe

A compilation of artists that accompanies us on the smartphone, tablet, computer or even in the “cloud” or a streaming system. **Zenit sound system is a door so that**

each person can access their musical universe from each room of their home or their work, in a simple way and with the maximum quality of sound.

Bluetooth and USB: It allows you to control the music from a smartphone or tablet via Bluetooth or play the music stored in USB devices.

Compatible with the main operating systems as iOS, Android, Windows Phone, Mac OS, Windows...

Zenit sound system also offers the possibility to listen to music from streaming platforms like Spotify, Google Play

Music, Apple Music, Amazon Music Unlimited, Napster... or any online streaming music or radio provider.

Multiroom

A different music in each room or the same in all the rooms, it's your choice

The installation **allows to control what music is heard in each room**, personalizing it in each case. In this way a person can listen to rock in the room, while in the kitchen classical music sounds. And the same in the workspaces, since in each office or meeting room you can tune in different music. But at any

time you can play the same music in all spaces equipped with Zenit sound system, thanks to the multiroom function.

Brings innovation to your home

It offers the sound quality of ABB in a device that will allow your customers to listen to a different music in each room. In

addition, its **avant-garde design** makes Zenit sound system the perfect ally of the decoration in any space.

Ease in your projects

Easy installation

To enjoy the Zenith sound system **you will not have to do work, because it is installed just like a switch**, you only need a hole with a power supply.

Whether it is a new installation or a refurbishment, the Zenit sound system can be installed very simply.

When using the ceiling module, to enjoy its FM radio or Bluetooth connection functionality no additional wiring to the power supply is required, since the communication between the ceiling module and the wall mounted remote control is wireless.

Also in the renovation

It adapts to the needs of each space

If you already have an old sound system from ABB or another brand, you can replace the old controls with the new modules of the Zenit sound system and continue using the speakers already installed. You will not need to have more holes in the wall than the existing ones, you can use those of the controls of your old sound system.

If you do not have a sound system, you can easily install a remote control on the wall taking advantage of any point where you have two standard 1-gang switches of ABB.

These two 1-gang switches can be changed by a 2-gang switch mounted in a single 1-gang box and occupy the other 1-gang box that remains free with the remote control of the Zenit sound system.

Now only one or several 5" loudspeakers (up to 4 loudspeakers per channel) have to be installed in the ceiling and, taking advantage of the hole created for the loudspeakers, housing the ceiling module next to the module.

Zenit - Sound system

Multiroom Bluetooth system

Product	Article-No.	Order-No.	Pack/Qty
	<p>Multiroom sound module Rated voltage: 127-230 Vac ± 15%; 50-60 Hz. Max. consumption: 200 mA. Stand-by consumption: 0,3W. Amplifier power: 6+6 W; <1% distortion (4 Ω). Speaker impedance: 4 Ω (2+2 W audio). FM radio digital tuner with RDS. Alarm clock with buzzer, radio types and snooze function. Bluetooth receiver: Bluetooth® v2.1 2.4GHz IEEE 802.15.1. Multiroom function available (1 master device and up to 14 slave devices). Remote control using code 9368.2 (ZigBee 2.4GHz IEEE 802.15.4). Optional: auxiliary module 9368.3 for I/O (1 mini-jack stereo input & 1 mini-jack stereo output) and USB connection functions.</p>

Zenit & ABB-free@home®

Making home automation easier than ever

Simply smart. ABB-free@home® transforms the house or the apartment into an intelligent home. Whether blinds, lights, heating, air conditioning, door communication or scenes. Easy to remote control via a switch on the wall, with the laptop or with the smartphone. Very convenient. Extremely comfortable. Very energy efficient. Especially attractive: Only minimal costs are involved when compared with conventional electrical installations.

—
FREEDOM

Home becomes smart

Just as you like it

The Smart Home

The perfect daily routine. With ABB-free@home[®] and Zenit, the entire home can be controlled not only with switches, but now even more practically: by smartphone or tablet and via touch or voice control. This allows home automation to be managed in a way that's mobile and smart, precise and flexible. For example, if the light atmosphere needs to be changed, tapping on the touchscreen or a simple voice command moves the blinds or changes the colours of the lights. Experience the future of smart living today.

Free choice

Live as your heart desires

Smart. ABB-free@home® transforms the house or the apartment into an intelligent home. Whether blinds, lights, heating, air-conditioning or door communication – comfort, safety and efficiency can finally be remotely controlled. Via a switch on the wall, via voice control or with a smartphone, tablet or personal computer.

The pleasure of simplicity

ABB-free@home® makes daily life easier. You can manage blinds, lights, heating, air-conditioning and door communication using just one system. The smartphone becomes the remote control in the house. It allows you to raise the blinds and switch on the radio in the kitchen with the touch of a button while you are still in bed – or to deactivate all lights and devices via a switch when leaving the house. Very convenient. Extremely comfortable. Very energy efficient. The setting of these scenes is as easy as can be – to suit the mood or situation.

Open for new ideas

With ABB-free@home® everyone can determine for themselves how they want to use the smart living technologies. Both individual functions, such as heating or control of blinds, or a combination of different functions can be implemented. Over the course of time the system can also be flexibly extended, if one so desires. Freedom of choice at all times.

Blind

Light

Heating

Air-conditioning

Door communication

Total networking

Blinds, lights, heating, air-conditioning, door communication

Comfortable right from the start. It begins with commissioning and continues later when used as a part of daily life. With ABB-free@home® and Zenit all applications in and around the house are amazingly easy to combine.

Blinds

Whether blind, roller blind, awning or roller door – with ABB-free@home®, sun protection and energy-saving could not be easier. Opening and closing, as well as adjustment of slats can be automated and controlled with switches, ABB-free@homeTouch (two sizes are available: 7" and 4.3") or the app for smartphone or tablet. In

addition, a weather station for protection during a storm, a timer or astro function can be used. It automatically adjusts the blind according to sunrise and sunset. The relevant data are combined in the System Access Point and are precisely implemented. The panel displays a comprehensive overview of all measured values and time settings.

- Provides numerous control options, dependent on brightness, temperature, rainfall and wind speed
- Shows weather data on the smartphone, tablet and display
- Reliably protects blinds and awnings against the effects of weather
- Optimises energy efficiency

Weather station

One thing is certain: the weather cannot be precisely predicted. The weather station records the brightness, temperature, rain and wind speed outside the home. Weather data are sent immediately and linked with actuators to automatically control functions. All important data are clearly displayed in the ABB-free@home® app.

Blind switch

Ready for all operating modes. With either a short or long press of the button for roller blinds, exterior blinds or awnings as well as adjustment of slats. In combination with a wind sensor, the roller blinds, exterior blinds and awnings close up completely and are locked during high wind conditions.

For a reassuring feeling. The various modules interact smoothly with one another, providing extra comfort, safety and efficiency. Every detail is aesthetically lit up, in all locations, both outside and inside the home.

Door communication

The ABB-Welcome door communication system can be integrated into ABB-free@home®. The door communication and home automation can be used together with ABB-free@homeTouch 7". For example, the light switches on when the doorbell rings to see visitors more clearly. And for reasons of safety, the video camera records pictures of visitors at the door when no one is home.

Pictures shown on the display

Practical and convenient. The pictures recorded by the video camera can be displayed on the tablet or smartphone via the ABB-Welcome app. This allows visitors who ring the bell to be recognised even when you are not at home (requires the ABB-Welcome IP gateway and ABB-Welcome outdoor video station).

- Large touch display (7", 17.8cm), to recognise who is at the door
- Easy operation keys for opening doors, mute function and light
- Integrated picture memory
- Configuration of "Welcome scenes" when a visitor rings the bell or the door is opened

Smart control via app and voice

Smartphone or tablet becomes the central control unit of the door communication. The ABB-Welcome app also makes remote control via the Internet possible. This makes communication possible with all visitors. Now you are at home everywhere.

Philips hue LEDs

Simply integrate the Philips hue LEDs into the system and control them via ABB-free@home®. This allows hue lamps to be comfortably controlled via a switch on the wall, or in a scene together with other lamps, even when the smartphone or tablet is not available.

Light control

Life begins with light. With ABB-free@home® it can be optimally used, whether for illuminating individual rooms or the entire house. For example, with striking light scenes – for different moods and to suit the occasion. A pleasant side effect here is the cost-saving and environmentally friendly use of energy.

- Easy to adjust light scenes
- Central or remote control
- Fast activation of emergency lighting
- Support of energy efficiency
- Flexible use
- Philips hue LED integration

**Dimmer and movement detector**

With ABB-free@home®, rooms or entire buildings can be illuminated according to your requirements. Each situation receives suitable light – whether striking light scenes or emergency lighting. All lights are switched on at once.

Pleasantly economical. The ideal room temperature throughout the day and night is the result of precise control. ABB free@home® connects all components for a fine-tuned indoor climate.

Heating and air-conditioning

Comfortable and energy-saving. The optimum room temperature can be adjusted with ABB-free@home® according to the actual requirement. In ECO mode, the temperature is automatically lowered at night or when no one is home. The heating can be automatically shut off when the windows are open. This reduces the energy consumption – whether for conventional heaters or under-floor heating.

The ideal temperature is never the same. Depending on the time of the day, the room temperature controller provides your personal feel-good temperature. The heating valves are controlled wirelessly – with radio-controlled thermal actuating drives. The room temperature controllers can be integrated into the switch combination. And the window contacts are net-worked wirelessly as well. That is both smart and efficient.

Intelligent thermostat

Radiator valve drives are the active components of individual room temperature control. They control all valves on the respective radiators. These drives use an electric motor to open or close the heating valves. They operate quietly and are not subject to movement-related wear. The ABB-free@home® network enables the finest nuances to be implemented, for the perfect climate at all times.

- Easy to retrofit
- No cooling or heating when windows are open

- Heating to suit individual requirements: depending on the daily routines instead of specific requirements
- For conventional heaters or under-floor heating
- Support of energy efficiency
- ECO mode
- Local operation or remote controlled via app for smartphone and tablet

THE SYSTEM

ABB-free@home® is easy to operate and at the same time flexible and adaptable to everyday situations or to those very special moments in life. And here, complete scenes can be played automatically or be set or called up spontaneously to suit the mood

Atmosphere at the press of a button

With a personal comfort scene

The perfect evening after a day at work. ABB-free@home® prepares a pleasant reception when arriving at home. With a colourful display of light and ambient room temperature. Precisely the right atmosphere for relaxing.

Philips hue LEDs

All functions of the Philips hue LEDs can be integrated in a scene. In addition to the brightness, the colour shade can also be defined in a scene.

**Fast change of scene**

A single press of the button on the switch, on the ABB-free@homeTouch, smartphone or tablet suffices to call up a complete scene. This, for example, allows a living room to be transformed in a matter of seconds to suit an occasion – for welcoming guests or for a pleasant evening of relaxation.

Simple scene configuration

To create or change your own individual scenes is child's play with ABB-free@home®. An intelligent assistance wizard helps to put together the desired functions. This, for example, allows the working light, cooker hood and Internet radio to be simultaneously activated via a binary output, while also dimming the light at the dinner table – again with a press of a button.

Present and yet not at home

With presence simulation

Everything is in perfect order at home. Because ABB-free@home® and Zenit brings life into rooms that are at times unoccupied. For this the system stores the habits of the residents while they are at home and then calls them up during their absence.

- Free app for iOS and Android devices
- Integrated picture memory
- Easy remote control via myABB-LivingSpace

Remote control for everything

Always a good feeling. The presence simulation of ABB-free@home® records the weekly sequence of the devices. This means that it's response is completely the same whether the residents are present or absent. Whether on a business trip, on holiday or while shopping around the corner. With the app on the smartphone, remote control and a safety check of the entire home is possible from anywhere in the world.

Automatic protection against wind

During windy weather and storms, ABB-free@home® together with a conventional weather station ensures blinds are automatically raised. This prevents damage such as buckling of the slats or broken window panes. This function is of particular benefit during one's absence because weather can change unexpectedly.

A complete overview

Always in the know about what is happening at home. With the ABB-free@home® app you can check at any time whether all the windows are closed or if someone has forgotten to switch off the lights. Also practical is the single, unified account for ABB-Welcome and ABB-free@home®.

myABB-LivingSpace

Everything controllable

Via the connection to the myABB-LivingSpace portal, most functions of ABB-free@home® can now be controlled and activated via remote control. This makes it possible to maintain control – even while on holiday, with maximum protection of one's privacy. Those who do not use a remote control can operate their ABB-free@home® system from the cloud.

Everything off with a single function

A reassuring feeling

The simplest type of switch-off. ABB-free@home® offers this with the everything-off function. It is especially practical when leaving the house. It simultaneously switches off all networked devices in all rooms.

Rest assured

In principle the everything-off function works just like a preset scene. In this case all networked devices are simultaneously switched off in all rooms. Aside from improving safety, this also improves energy efficiency. The

everything-off function is especially practical at the bedside. Before falling asleep the entire lighting in the house can be switched off with just a press of a button. A very practical function that adds comfort and safety.

Pre-programmed everything-off switch
Easy to operate

Near and far

The central switch for the everything-off function can be located on the wall near the front door and, of course, at any other location in the house. And for mobile use it can be displayed in the app on the smartphone or tablet.

Easy to use

A variety of control options

The new independence. Creating the perfect indoor climate or ideal illumination can now be done via flexible and precise remote control – with the touch of a finger or voice commands. Operation as simple as desired.

ABB-free@homeTouch

Thanks to its two different colours (black and white) and its two different sizes (7" and 4.3"). Offers up to 16 functions, and intuitive operation via tapping or swiping. Easy to set up and even easier to operate – plus making adjustments is a snap.

The modern switch

The easiest operation is the one everyone is used to. And today's wall switch is always in the right place. This is especially so because the wireless version makes additional cabling unnecessary. Switches are the better performers.

“Switch on the ceiling light in the living room.”

“Okay. The light ‘ceiling light’ in the living room has been switched on.”

Tablet and smartphone

The operating concept provides the highest flexibility and mobility because everyone has the choice to control the functions also mobile via the smartphone or tablet. And thanks to the ABB-free@home® app, also with the tip of the finger while travelling. Easier than ever.

Voice control

The intelligent voice control makes the ABB-free@home® app respond to every word. If you say “Switch the ceiling light on”, the system will ask “Do you mean the ‘ceiling light’ in the kitchen, in the living room or in the bathroom?”. Very handy if you don’t feel like getting up at the moment.

Zenit

Sensors

Product	Article-No.	Order-No.	Pack/Qty
	free@home Sensor unit 1-gang - 2M For sending switching, dimming and blind commands to an ABB-free@home® actuator. To be used with ABB-free@home® 2 fold push buttons. Control element: Switch contacts top/ bottom. Display elements: LED as light for orientation or display of switching state. Protection class of device: IP 20. Mounting depth: 14,1 mm. To be installed with SR-2-N2 cover plates.		
	SU-F-1.0.PB.1	2CKA006220A0222	1

	free@home Sensor unit 2-gang - 2M For sending switching, dimming and blind commands to an ABB-free@home® actuator. To be used with ABB-free@home® 4 fold push buttons. Control element: Switch contacts top/ bottom. Display elements: LED as light for orientation or display of switching state. Protection class of device: IP 20. Mounting depth: 14,1 mm. Zenit

Sensor & blind actuators

Product	Article-No.	Order-No.	Pack/Qty
	free@home Sensor/Blind actuator 1/1-gang - 2M For controlling blind and awning motors. With integrated blind actuator. Blind function is available pre-configured. To be used with ABB-free@home® 2 fold push buttons. Outputs: 1× Change-over contacts/normally open contact, potential-bound. Rated power: 920 VA. Rated current: 4 A. Suitable for: Operating mode blind. Protection class of device: IP 20. Mounting depth: 31,5 mm. To be installed with SR-2-N2 cover plates.		
	SBA-F-1.1.PB.1	2CKA006220A0237	1

	free@home Sensor/Blind actuator 2/1-gang - 2M For controlling blind and awning motors. With integrated blind actuator. Blind function is available pre-configured. To be used with ABB-free@home® 4 fold push buttons. Outputs: 1× Change-over contacts/normally open contact, potential-bound. Rated power: 920 VA. Rated current: 4 A. Suitable for: Operating mode blind. Protection class of device: IP 20. Mounting depth: 31,5 mm. To be installed with SR-4-N2 cover plates.		
	SBA-F-2.1.PB.1	2CKA006220A0238	1

Motion sensor & actuators

Product	Article-No.	Order-No.	Pack/Qty
	free@home 180° motion sensor - 2M With select lens for detection with animal access. For automatic switching of ABB-free@home® actuators dependent on movement and brightness. To be used with ABB-free@home® Zenit cover plates for movement detector. Detection range: frontal 6 m, lateral 3 m. Detection angle: 180°. Brightness limit value: 1 – 500 lux. Protection class of device: IP 20. Mounting depth: 14.1 mm. To be installed with CP-MD-N2 cover plates.		
	MD-F-1.0.PB.1	2CKA006220A0229	1

	free@home 180° motion sensor/actuator - 2M With select lens for detection with animal access. Including an integrated actuator for switching 230 V~ devices. To be used with ABB-free@home® Zenit cover plates for movement detector. Outputs: 1× normally open contact, potential free. Suitable for: resistive. Rated current: 10 A. Rated power: 2300 W. Suitable for: capacitive. Rated current: 10 AX. Detection range: frontal 6 m, lateral 3 m. Detection angle: 180°. Brightness limit value: 1 – 500 lux. Protection class of device: IP 20. Mounting depth: 31.5 mm. To be installed with CP-MD-N2 cover plates.		
	MSA-F-1.1.PB.1	2CKA006220A0231	1

Room temperature controller

Product	Article-No.	Order-No.	Pack/Qty
	free@home Room temperature controller - 2M Room temperature control function for controlling commercially available valve drives or analogue valve drives (continuous controllers). With display of set-value temperature. Only to be used with ABB-free@home® Zenit cover plates for room thermostat. Display elements: LCD Display showing operation modes. Protection class of device: IP 20. Mounting depth: 17,9 mm. To be installed with CP-RTC-N2 or CP-RTC-FC-N2 cover plates.		
	RTC-F-1.PB	2CKA006220A0276	1

Touch displays

Color	Article-No.	Order-No.	Pack/Qty
	ABB-free@home Touch 7" For the central control of up to 16 configurable ABB-free@home® functions of type: switching, dimming, blind, RTC, scene, Philips HUE. Display of the video image of the outdoor station of ABB-Welcome door entry system. Suitable as room temperature controller extension unit (up to 8). Surface mounting. The bus can be connected via enclosed terminal block. Display size / resolution: 17.8 cm (7") / 800 x 480 Consumer units: 11 Display elements: TFT Touch Display Dimensions: (L x W x D): 155 mm x 218 mm x 29 mm Programming only with bus voltage applied via the web interface of the System Access Point. The power is supplied by the ABB-Welcome system controller or when using the ABB-free@home panel without an ABB-Welcome system, a separate ABB 24 V- power supply is required. Protection class (device): IP30 Temperature range (device): -5 °C to 40 °C		
White	DP7-S-611	2CKA008300A0356	1
Black	DP7-S-625	2CKA008300A0357	1

	ABB-free@home Touch 4.3" For the central control of up to 16 configurable ABB-free@home® functions. For the display of configurable system messages. A configurable primary function can be triggered with a multi-touch gesture. Capacitive touch screen with closed glass surface. With integrated room temperature controller and temperature sensor. In connection with temperature sensor 6226/T the integrated room temperature controller can be fitted with a remote sensor. Suitable as room temperature controller extension unit (up to 8). Requires additional ABB power supply 24 VDC. Display size / resolution: 10.9 cm (4.3") / 480 x 854. Mounting height: 8 mm. Control element: freely programmable touch surfaces. Display elements: LCD display Bus voltage: 24 V- Dimensions: (L x W x D): 104 mm x 143 mm x 53 mm Programming only with bus voltage applied via the web interface of the System Access Point. Protection class (device): IP20 Temperature range (device): -5 °C to 40 °C		
White	DP4-1-611	2CKA006220A0119	1
Black	DP4-1-625	2CKA006220A0120	1

	Flush mounting installation box For flush-mounted in hollow-wall installation of the ABB-free@homeTouch 4.3". Windproof. Installation dimensions (H x W x D): 82 mm. x 123 mm. x 50 mm. Mounting depth: 50 mm. Halogen free.		
Black	DP4-F	2CKA006220A0389	1

	Temperature sensor For use as remote sensor with ABB- free@homeTouch 4.3". Line type: H03 VV-F Cable length: 4 m Type: NTC 10 kohm.		
	DP4-T-1	2CKA006220A0721	1

System Access Point

Product	Article-No.	Order-No.	Pack/Qty
	System Access Point - Wireless For commissioning and remote control of the ABB-free@home® system. With integrated free@home wireless antenna. With integrated free@home bus connection. Allows the execution of astro and time programs. Commissioning and remote control is executed via the web interface or app. No additional commissioning software is required. Easy commissioning with WLAN ad-hoc mode. WLAN modes switchable via local operation. Connection to the home network via WLAN client mode or via CAT cable. The bus connection is provided via the enclosed bus terminal. Display elements: LED for status display. Rated voltage: 230 V~; 50/60 Hz. Bus voltage: 24 V. Dimensions: (L x W x D): 110 mm x 170 mm x 31 mm Programming via the web interface of the System Access Point. Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C		
	SAP-S-2	2CKA006200A0105	1

	External antenna - Wireless For use with System Access Point SAP-S-2 and SAP-S-127.2. Feed the free@home wireless signal to the outside when the internal antenna of the System Access Point is shielded due to structural conditions. With magnetic base. Cable length: 1.5 m.		
	SAP-1-WL	2CKA006200A0100	1

Weather station

Product	Article-No.	Order-No.	Pack/Qty
	Weather station For recording and transmitting of brightness, temperature, wind speed and rain. Weather data can be linked with actuators to automatically control functions. Weather data can be visualized in the free@home web interface and the free@home app. Wind speed measuring range 2 - 30 m/s The bus can be connected via enclosed terminal block. Rated voltage: 110 V~ - 230 V~; 50/60 Hz. Bus voltage: 24 V- Inputs: 4 Temperature range (sensor): Brightness limit value: 1 lux - 100000 lux Dimensions: (L x W x D): 108 mm x 121 mm x 227 mm Protection class (device): IP44 Temperature range (device): -20 °C to 55 °C		
	WS-1	2CKA006220A0390	1

Power supply

Product	Article-No.	Order-No.	Pack/Qty
	Power supply Power supply with integrated choke. Fast diagnosis due to LED display for operational readiness and errors. The bus can be connected via enclosed terminal block. Display elements: operational load/overload LED Rated voltage: 127 V~ - 230 V~, +10 % / -15 %; 50/60Hz Secondary: 30 V, +2 V / -2 V Outputs: 1 Rated current: 640 mA Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm Module width (DIN-rail): 4 MW		
	PS-M-64.1.1	2CDG510001R0011	1

Zenit

Binary inputs

Product	Article-No.	Order-No.	Pack/Qty
 <p>Binary input 2-gang Conventional push-buttons or auxiliary contacts can be connected to 2 channels. The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m. Flush-mounted device for installation in a 60 mm device box or distribution box. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Bus voltage: 24 V Inputs: 2 Polling voltage: 20 V- Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 39 mm x 40 mm x 12 mm.</p>	BI-F-2.0.1	2CDG510002R0011	1
 <p>Binary input 4-gang Conventional push-buttons or auxiliary contacts can be connected to 4 channels. The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m. Flush-mounted device for installation in a 60 mm device box or distribution box. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Bus voltage: 24 V Inputs: 4 Polling voltage: 20 V- Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 39 mm x 40 mm x 12 mm</p>	BI-F-4.0.1	2CDG510003R0011	1
 <p>Binary input 4-gang The device detects AC/DC signals of 10 - 230 V via 4 channels. The information of the signal evaluation can be used for controlling ABB-free@home® actuators or for recording status information. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Bus voltage: 24 V Inputs: 4 Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 36 mm x 64 mm Module width DIN-rail): 2 MW</p>	BI-M-4.0.1	2CDG510004R0011	1

Switch actuators

Product	Article-No.	Order-No.	Pack/Qty
 <p>Binary input 8-gang / switch actuator 8-gang Combination device with 8 binary inputs and 8 switch actuators. Conventional push-buttons or auxiliary contacts can be connected to 8 channels. The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available by the device itself. Maximum cable length at a cable cross-section of 1.5 mm² < 100 m For switching 8 independent 230 V~ loads. No additional commissioning software is required. Programming only with bus voltage applied via the web interface of the System Access Point. Bus voltage: 24 V Inputs: 8 Polling voltage: 35 V- Outputs: 8 Normally Open contact, potential free Suitable for: AC1 (Output voltage: 230 V~) Rated current: 6 A, cos φ0.8 Suitable for: AC3 (Output voltage: 230 V~) Rated current: 6 A, cos φ0.45 Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 144 mm x 64.5 mm Module width (DIN-rail): 8 MW.</p>	SA-M-8.8.1	2CDG510007R0011	1
 <p>Switch actuator 4-gang For switching 4 independent 127 V~/230 V~ loads. Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting. The bus can be connected via enclosed terminal block. Control element: relay control element. Display elements: relay control element. Programming only with bus voltage applied via the web interface of the System Access Point. Power dissipation: 4 W Bus voltage: 24 V Outputs: 4 Suitable for: AC1 (Output voltage: 230 V~) Rated current: 16 A, cos φ0.8 Suitable for: AC3 Rated current: 8 A, cos φ0.45 Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm Module width (DIN-rail): 4 MW.</p>	SA-M-0.4.1	2CDG510006R0011	1

Zenit

Dimming actuator

Product	Article-No.	Order-No.	Pack/Qty
	Dimming actuator 4-gang Multi-channel universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps. For dimmable Retrofit-LEDs (LEDi). Increasing the max. load via channel bridging possible. The outputs can be switched parallel in any combination. Outputs automatically recognize the connected load. In addition, the operating mode can be selected manually. Status indication of the channels via LED. The bus can be connected via enclosed terminal block. Display elements: outputs status indication via LED. Programming only with bus voltage applied via the web interface of the System Access Point. Rated voltage: 230 V~; 50/60 Hz Bus voltage: 24 V Outputs: 4 dimming channel Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer. Rated power: 10 - 315 W/VA Suitable for: LEDi and energy-saving bulbs; typical Rated power: 2 - 80 W/VA Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm Module width (DIN-rail): 8 MW.		
	DA-M-0.4.2	2CKA006220A0395	1

Blind actuator

Product	Article-No.	Order-No.	Pack/Qty
	Blind actuator 4-gang For controlling 4 independent blind or roller shutter drives. The outputs are inversely blocked. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Power dissipation: 2 W Bus voltage: 24 V Outputs: 4 Suitable for: AC3 (Output voltage: 230 V~) Rated current: 6 A, cos φ0.45 Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm Module width (DIN-rail): 4 MW.		
	BA-M-0.4.1	2CDG510011R0011	1

Heating & fan coil actuators

Product	Article-No.	Order-No.	Pack/Qty
	Heating actuator 6-gang For controlling thermoelectric actuating drives in heating/cooling systems. The outputs are protected against short-circuit and overload. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Power dissipation: 2 W Bus voltage: 24 V Outputs: 6 Suitable for: resistive Rated current: 160 mA Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C. Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm. Module width (DIN-rail): 4 MW.		
	HA-M-0.6.1	2CDG510008R0011	1

	Heating actuator 12-gang For controlling thermoelectric actuating drives in heating/cooling systems. The outputs are protected against short-circuit and overload. The bus can be connected via enclosed terminal block. Programming only with bus voltage applied via the web interface of the System Access Point. Power dissipation: 4 W Bus voltage: 24 V Outputs: 12 Suitable for: ohmic Rated current: 160 mA Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm. Module width: 8 MW.		
	HA-M-0.12.1	2CDG510009R0011	1

	Fan coil actuator For controlling blower convectors. Supports 2-pipe and 4-pipe system for heating and cooling. The fan speed levels can be switched using a changeover or step switch function. Three contacts for switching a three-stage fan. Two contacts for activating the heating and cooling valves. Supports 24V and 230V valves. With two binary inputs for connecting dew-point and condensation contacts. The scanning voltage is provided by the device. The bus connection is provided via the enclosed bus terminal. Programming only with bus voltage applied via the web interface of the System Access Point. Bus voltage: 24 V Inputs: 2 Polling voltage: 10 V- Outputs: 3 Normally Open contact, potential free Suitable for: AC3 (Output voltage: 230 V~) Rated current: 6 A Protection class (device): IP20 Temperature range (device): -5 °C to 45 °C. Dimensions: (L x W x D): 90 mm x 108 mm x 64.5 mm. Module width (DIN-rail): 6 MW.

Zenit & ABB i-bus® KNX

Details and solutions for intelligent building control

KNX brings your home to life. Convenient, safe and with foresight.

The living room is comfortably warm on time, it stays nice and cool in the bedroom, the light matches the situation independently and the blinds adjust by themselves to the weather or time of day. Nice when comfort is easily taken for granted. With intelligent building networking from ABB.

SMART BUILDING

Rooms with intelligence. Modern building automation has become more efficient than ever in order to meet the many demands of people living and working in the building. Adaptable systems turn the modern functional building into a smart building. They create an environment in which communication and creativity can freely express themselves. Ideal for efficiency, perfect for the future

Zenit KNX

Suitable for every need

Zenit is based on a combinable concept which, creating a comprehensive range, is suitable for all needs. Optimising comfort, safety and efficiency in homes and buildings. Providing comfort solutions to satisfy all types of needs and projects. Ensuring safety and protection of persons and goods. Saving energy by using only the amount of energy required.

Zenit offers two different mounting plates for KNX sensors, corresponding to different market standards: Square boxes with 60 mm. distance between screws and rectangular boxes with 83,5 mm. distance between screws.

- **Multiple functions:**
switching, dimming, blinds sending values, scenes, etc.
- Incl. 10 logic channels
- Sequence actuator
- Logic gates
- Control element: switch contacts
- Display elements: LED to indicate the function

SMART BUILDING

The perfect connection. A pleasant and productive environment is created with building automation that functions as a holistic system and combines various functions. For today and tomorrow

Zenit Sensors

Product	Article-No.	Order-No.	Pack/Qty
 <p>KNX sensor - 1/2-gang - 2M For ABB i-bus® KNX. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The accompanying symbol can be replaced by the symbols for lighting, blinds, room thermostat, scene and FanCoil. Push switch function: switching / dimming / blind / sending values / scenes etc. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Control element: Switch contacts. Display elements: LED to indicate the function. Temperature range (Device): -5 °C to 45 °C. To be installed with N2221.2 cover plates.</p>	6125/98-509	2CKA006115A0444	1

 <p>KNX sensor - 2/4-gang - 2M For ABB i-bus® KNX. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The accompanying symbol can be replaced by the symbols for lighting, blinds, room thermostat, scene and FanCoil. Push switch function: switching / dimming / blind / sending values / scenes etc. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Control element: Switch contacts. Display elements: LED to indicate the function. Temperature range (Device): -5 °C to 45 °C. To be installed with N2221.4 cover plates.</p>	6126/98-509	2CKA006116A0219	1
---	--------------------	-----------------	---

 <p>KNX sensor - 3/6-gang - 2M For ABB i-bus® KNX. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The accompanying symbol can be replaced by the symbols for lighting, blinds, room thermostat, scene and FanCoil. Push switch function: switching / dimming / blind / sending values / scenes etc. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Control element: Switch contacts. Display elements: LED to indicate the function. Temperature range (Device): -5 °C to 45 °C. To be installed with N2221.6 cover plates.</p>	6129/96-509	2CKA006118A0105	1
--	--------------------	-----------------	---

Product	Article-No.	Order-No.	Pack/Qty
 <p>KNX sensor - 3/6-gang with IR receiver - 2M For ABB i-bus® KNX. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The accompanying symbol can be replaced by the symbols for lighting, blinds, room thermostat, scene and FanCoil. Push switch function: switching / dimming / blind / sending values / scenes etc. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). To be installed with N2221.7 cover plates.</p>	6129/98-509	2CKA006118A0108	1

Room temperature controller

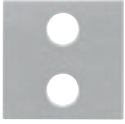

Product	Article-No.	Order-No.	Pack/Qty
 <p>KNX room temperature controller - 2M For ABB i-bus® KNX. Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2 - and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment. Display elements: LCD showing operation modes. Temperature range (Device): -5 °C to 45 °C. To be installed with N2240.4 cover plates.</p>	6124/98-509	2CKA006134A0297	1

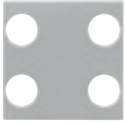

Motion sensor

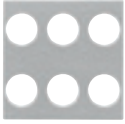

Product	Article-No.	Order-No.	Pack/Qty
 <p>KNX 180° motion sensor - 2M For ABB i-bus® KNX. Movement detector with up to 4 channels. Protection class (Device): IP 20. Temperature range (Device): -5 °C to 45 °C. Detection range: frontal: 6 m, lateral: 6 m. Brightness limit value: 5 Lux - 150 Lux. Detection angle: 180 ° Dimensions: (L x W x D): 53 mm x 44 mm. Position for installation: vertical. Mounting height: 1.1 m. To be installed with N2241.4 cover plates.</p>	6122/98-509	2CKA006132A0307	1

1- Technical Data

Power Supply: 127 V~ / 60 Hz
230 V~ / 50 Hz

Night orientation: By a red LED
Operating T°: 0° C +40° C

Maximum power:

127 V~ / 60 Hz:

☀️1600 W, ☒1600 W, ☒1600 W, ☉1600 W, ⇨700 W

230 V~ / 50 Hz:

☀️3000 W, ☒3000 W, ☒3000 W, ☉1600 W, ⇨1300 W

2.- Mounting and connection scheme

2.1.- Mounting

2.2.- Connection

Important: Disconnect the electrical power when installing.

3.- Operation

Time selector for disconnection: The load time disconnection, after removing the card, can be programmed by the user through the rotary programme selector on the device cover.

Disconnection time selector

Option	Time until disconnection		Previous status	Current Status	Action
	50Hz	60Hz			
1.-	5 s.	4 s.	No card	Card detected	Connects load
2.-	10 s.	8 s.			
3.-	20 s.	16 s.			
4.-	30 s.	25 s.	Card detected	No card	Disconnects the load at preset time
5.-	60 s.	50 s.			
6.-	90 s.	75 s.			

Blind switch & push-button

Electronic blind switch

N2261.2

Technical data:

- Power Supply: 230V~ 50Hz / 127V~ 60Hz
- Maximum power:
 - 230V~ 50Hz blind motors: 2x 700VA persianas (cos φ = 0,5)
 - 127V~ 60Hz blind motors: 2x 350VA persianas (cos φ = 0,5)
- Room temperature for operation: 0°C to 40°C
- According to: UNE-21806 y EN-55014

Functional features:

The electronic blind switch includes 3 modes of operation (to be selected in the rotatory switch):

- P: standard blinds control. Optionally other N2244 inserts can be connected to the N2261.2 to control the blind from other locations.
- V: venetian type blinds control. Optionally other N2244 inserts can be connected to the N2261.2 to control the blind from other locations.
- C: centralization. One N2261.2 can control all the N2261.2 centrally.

Wiring diagram:

- Direct blind control with a N2261.2 (Fig. 1).
- Remote control of the N2261.2 electronic blind control by using a blind push-button N2244 (Fig. 2).
- Centralized control of all the blind from one point by using a electronic blind switch N2261.2 as master of the rest electronic blind switches N2261.2 (Fig. 3).

Fig. 1

Fig. 2

Fig. 3

Mounting:

Follow the steps below to install the mechanism:

1. Connect the device according to the connection schemes. Figure 1, 2 or 3.
2. Assemble the device on the flush mounting box.
3. Then, place the plate.

1.

2.

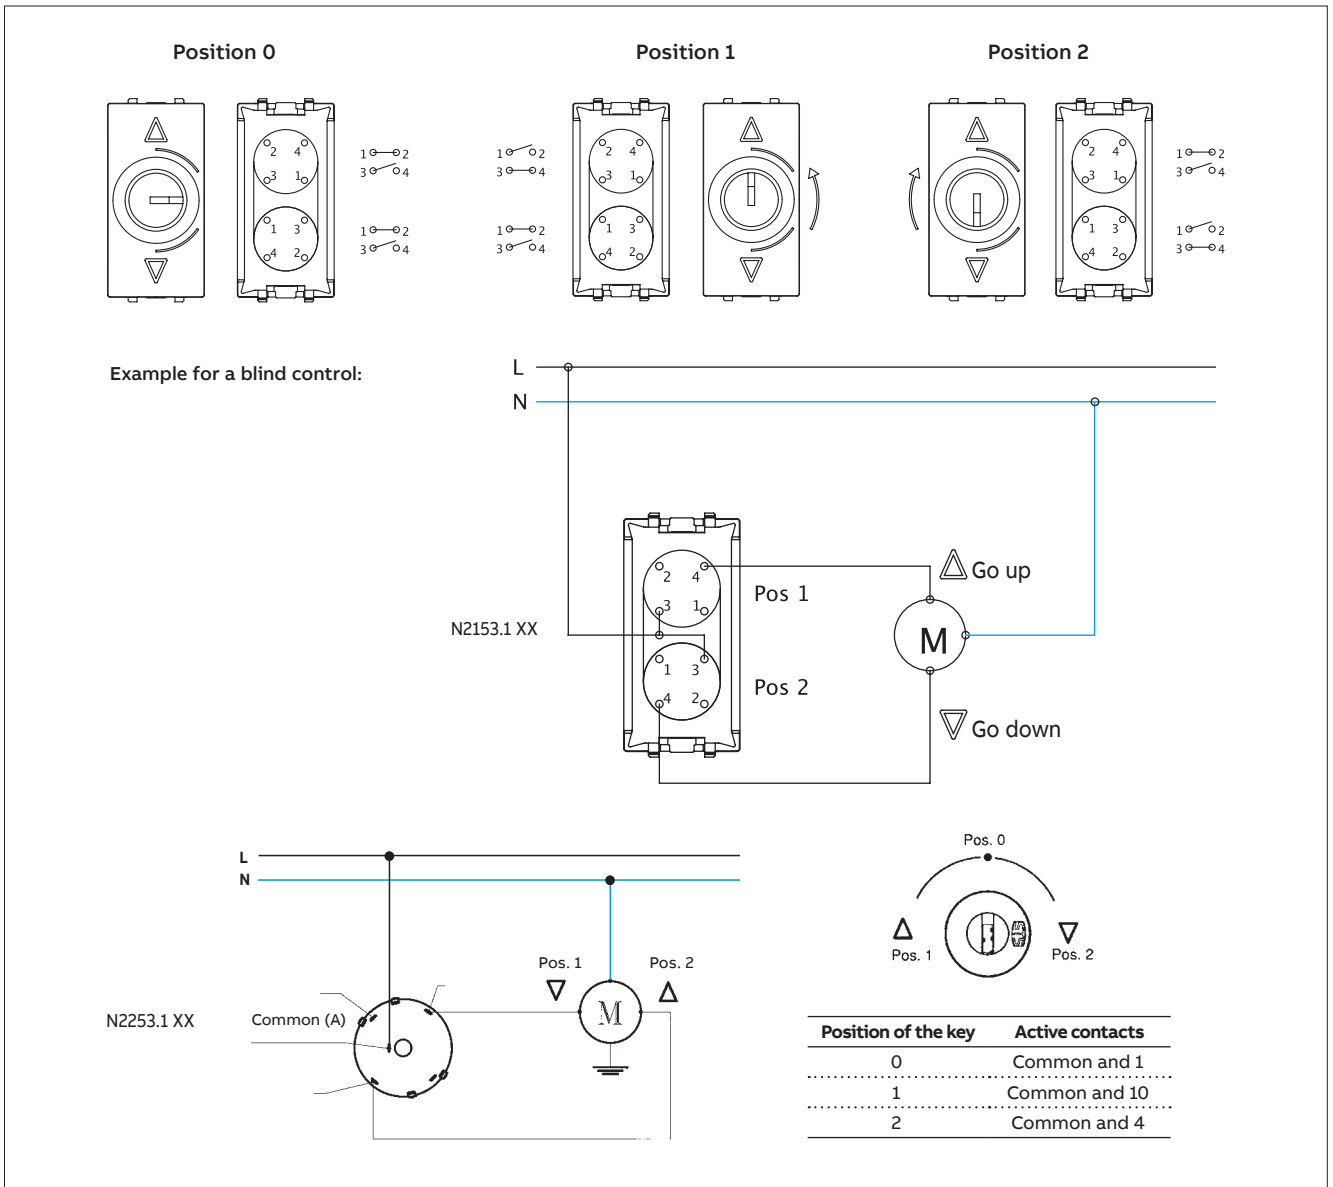

3.

Operation:	Blind operating mode.	Slats or Venetian blinds operating mode.	Centralized operating mode.
Pulsation	Action	Action	Action
Short pulsation ▲ < 300ms	It raises the blind (3 min.), which was previously stationary. It stops the blind, which was previously moving.	It raises the blind (3 min.) which was previously stationary. It stops the blind, which was previously moving.	It raises the blinds (of those inserts connected), which were previously stationary. It stops the blinds, which were previously moving.
Short pulsation ▼ > 300ms	It lowers the blind (3 min.), which was previously stationary. It stops the blind, which was previously moving.	It lowers the blind (3 min.), which was previously stationary. It stops the blind, which was previously moving.	It lowers the blinds (of those inserts connected), which were previously stationary. It stops the blinds, which were previously moving.
Long pulsation ▲ < 300ms	Raises the blind while the pulsation lasts, which was previously stationary. It stops the blind, which was previously moving.	The slats rotates upwards in a pulsed way while the pulsation lasts, if the blind was previously stationary. If the pulsation lasts longer, the blind will raise for as long as the pulsation lasts. It stops the blind, which was previously moving.	It raises the blinds (of those connected mechanisms), which were previously stationary. It stops the blinds, which were previously moving.
Long pulsation ▼ > 300ms	It lowers the blind while the pulsation lasts, if it was previously stationary. It stops the blind, which was previously moving.	The slats rotates downwards in a pulsed way while the pulsation lasts, if the blind was previously stationary. If the pulsation lasts longer, the blind will raise for as long as the pulsation lasts. It stops the blind, which was previously moving.	It lowers the blinds (of those connected mechanisms), which were previously stationary. It stops the blinds, which were previously moving.

CEE89/336, 92/31 CEE & 93/68 EEC

3.- Wiring diagram:

4.- Installation

1. Fix the plastic support in the mounting plate.
2. Insert the mechanism in the mounting plate from the rear side.
3. Place the cover plate.

4.- Current-Time tripping diagram

TV / R outlets

Technical data

- Connection: Screw terminal and clamp. Coaxial cable 75 ohm.
- Shielded zamak and metal plate chassis.
- In conformity with EN 50083-1:1993, EN 50083-2:2001, EN 61000-6-1:2001, EN 61000-4-2:1995 ESD 15KV AD, 8KV CD, EN50083-4:1998
- Fits in a Ø60 mm box.

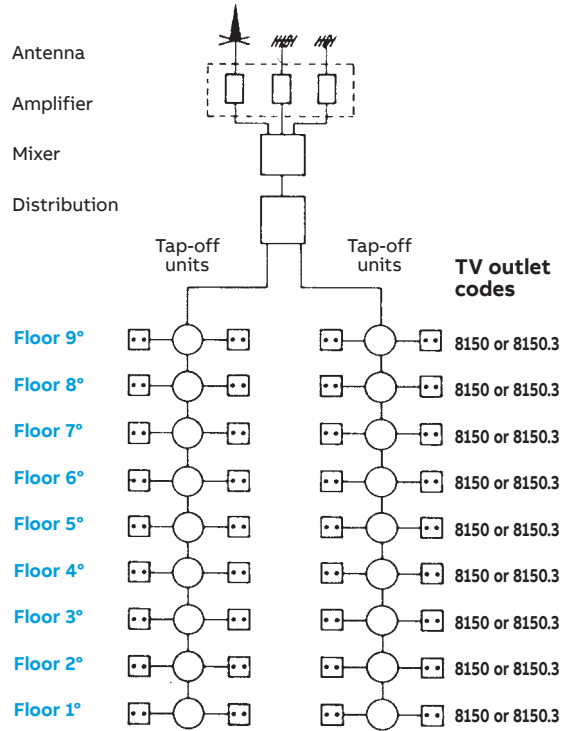

Important: the connection of the TV outlets in serial distribution must be carried out according to the figure on the left. The cable coming from the previous outlet is connected in the right terminal and the cable going to the next outlet in the left terminal.

Code			8150	8150.3	8150.7	8150.8

Note: reference 8150.3 compatible with CATV

MATV connection diagram Distribution with tap-off units

In this diagram all final outlets are the same. References 8150 or 8150.3 can be used equally.

MATV connection diagram Serial distribution up to 9 floors

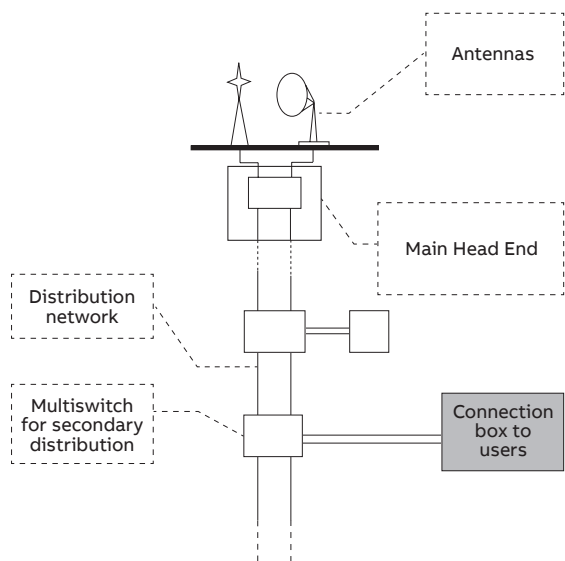

MATV connection diagram Serial distribution for more than 9 floors

Example: 10 floors. The floors are divided in 2 groups of 5 floors each. The outlets are distributed according to the criteria shown in the MATV connection diagram for serial distribution up to 9 floors. The diagram above can be used in buildings up to 18 floors. For buildings with more than 18 floors and up to 27 floors, 3 groups have to be created and so on.

Tomas de TV-R / SAT

SMATV connection diagram

a) SMATV star connection diagram

a) SMATV star connection diagram

Note:

End of line impedance. If the distribution equipment requires outlets with end of line resistors, 8151.7/N2251.7 outlets must be used or add to 8151.3/N2251.3 outlets a termination resistor to close the line.

Note:

It is recommended to avoid installing more than 2 intermediate outlets per line.

N2250.X & N2252 covers for TV outlets

1. In some cases the TV outlets have too small holes for frame's clamps.

2. There are two options of mounting the cover plates: a) cut the clamps that are facing the small holes.

b) Cut all the clamps of the frame.

3. When the cover plate is screwed to the insert, the 4 parts that stick out from the cover, will fix the frame to the wall.

N2251.3 TV-R/SAT outlet single, N2251.7 TV-R/SAT outlet dead-end and N2251.8 TV-R/SAT outlet loop through

Mounting diagram

Cable to use

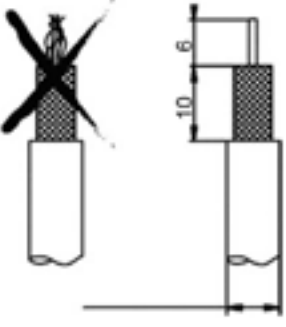

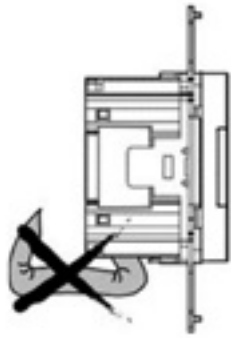

Cable to use

- Use coaxial cable with 75Ω impedance.

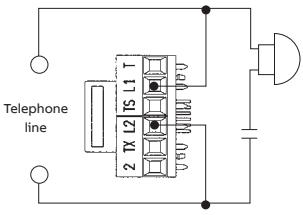

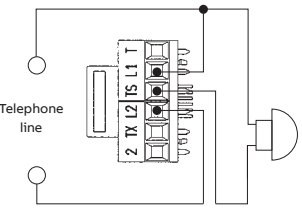

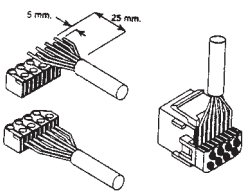

- Avoid small bending radius.

RJ45 Cat. 6 female connector

2018.6

1 Preparing the Cable

1.1 Cut approximately 5 cm. off the jacket.

1.2 Open approx. 10 cm. of the jacket with a cutter cord or another tool.

1.3 Cut the jacket.

1.4 Cut the mesh (if it has one and the cord at the same level of the jacket).

2 Preparing the Conductors

2.1 Select the adequate wiring scheme (568A or 568B) and place the pairs in a straight line.

Important Note:
Do not cross the pairs over one another!
First, arrange/position pairs 1 and 4, and then pairs 2 and 3 in their usual line.

568A	Az	Ma	Ve	Na
568B	Az	Ma	Na	Ve

2.2 Position each of the four pairs in the holes of the end piece.

2.3 Ensure the end piece is located as close as possible to the edge of the jacket.

2.4 Place the pairs in the direction of the end piece slots.

2.5 Insert the end piece into the module.

Blue / White (first pair)

Check the orientation of the colour codes: Blue / White matched with Blue / White

Important Note:
Align the Blue / White pair with the Blue / White colour indicated in the module colour code.

Position the piece with the flat side facing upwards.

2.6 Unbraid the pairs, position and insert the cable in the module slots. Place the **solid colour cable in the first slot of the pair.**

3 Conductor Terminations

3.1 Place the tool perpendicular to the module and finish cutting the cables.

Place the cutting edge towards the module external side!

Note: Use a NORDX/CDT BIX AX100749, KRONE wiring tool, or a similar type 110 tool.

4 Placing the Cable

4.1 Place the cable in the upper, perpendicular, or lower position so that it is easy to insert the module in the box for attachment.

5 Disassembling the module from the supporting piece

5.1 Push the front of the module in with your thumb releasing the hooks.

5.2 Pry upwards to release the upper hook.

5.3 Pry downwards to release the lower hook.

RJ45 Cat. 5E female connector

2018.5

- 1** Remove the back cap from the connector. Strip approx. 5cm off the jacket and discard the cable cutter cord.

- 2** Bring the cable close to the connector, with the jacket at approx. 6 mm from the connector. Insert the cables into the corresponding slots as indicated by the cable colour-wiring configuration for T568A or T568 B (as shown in Figures 2A and 2B).

- 2a** Wiring according to T568A:

- 2b** Wiring according to T568B:

IMPORTANT:
Place the connector in such a way that the printed letters A and B are facing up

- 3** Push the cables against the end of the slot and cut them flush to the connector. Use an IBDN 110, BIX, KRONE wiring tool, or a similar type 110 tool.

- 4** Mount the connector cap.

Rotary/push dimmer - N2260.2

1. Technical data

Electrical data:

- Power supply: 230 V~ ; 50 Hz
- Minimum power: 60 W / VA
- Maximum power:
500 W incandescent lamps.
500 VA halogen lamps with electronic transformer.
400 VA halogen lamps with ferromagnetic transformer.
- Room temperature for operation: 0 to 30 °C.

Features:

- Dimming control by means of a local push button (N2260.1 and N2260.2) and a dimmer switch (N2260.2).
- Control capability through auxiliary push buttons (N2X04.X).
- LED indicator pilot.

Detecting the type of load

- After wiring the device to the power supply, the dimmer assesses the type of the load connected.

Overload

- If the device overloads above the maximum rated power, or if the operating temperature exceeds the maximum, the regulator will automatically stop working as a safety measure.

Short Circuit

In case of short circuit, the device will stop working as a safety measure.

Note: Disconnect the device from the power supply if you are making changes to the load.

2. Assembly/Connection

2.1. Connection

Important: disconnect the power supply when installing.

Figure 1:
Basic wiring diagram

Figure 2: Special wiring diagram

Wiring for direct control

The electrical wiring for these devices is performed according to the wiring diagram shown in Figure 1.

The terminal marked "L" shows the phase wire of the installation.

The terminal indicated with \overline{N} represents the conductor wiring terminal returning from the load, which is also connected to the neutral conductor of the installation. See Figure 1.

The terminal marked "1" is used to exercise control from several points by means of conventional push buttons. See Figure 2.

If the device is installed individually, follow the instructions indicated in Figure 1.

Wiring for remote control option

The special characteristics of these dimmers enable the remote control using conventional auxiliary push buttons (N2X04.X), making it possible to control the turning on and off and dimming features from different points using only one electronic dimmer and any number of conventional push buttons as desired.

In case it is required to exercise control from several points, refer to the diagram below. Any number of auxiliary conventional push buttons may be used as needed.

The outputs of these push buttons are connected to terminal "1". See Figure 2.

Note: pay special attention to the device input and output conductors, according to the previous description.

3. Mounting

To install the device follow these steps:

1. Connect the device based on the corresponding wiring scheme. Figure 1 and Figure 2.
2. Mount the device on the wall box.
3. Then, position the plate.

Figure 3: Installation

4. Operation

The operation of the dimmer during the set up, disconnection or regulation is as follows:

Short pulsation

If the dimmer is off, upon receiving a short pulsation it will turn on using always the maximum level of light.

If the dimmer is on, upon receiving a short pulsation it will turn off.

A short pulsation refers to any pulsation lasting between 50 ms and 400 ms.

Long pulsation

If the dimmer is off, upon receiving a long pulsation it will turn on using the minimum level of light. Then it will increase it until the pulsation stops, or until it reaches the maximum level of light.

If the dimmer is on, upon receiving a long pulsation the dimming direction will reverse: if the level of light has increased up to a certain point, it will diminish, and vice versa. Whenever the maximum (or minimum) level of light is reached during a long pulsation, the dimming will stop in the maximum (or minimum) level, even if pulsation continues.

A long pulsation refers to any pulsation lasting for more than 400 ms.

Turning the knob clock-wise:

- If the load is off, or in the maximum intensity level, it will not perform any action.
- If the load is in a specific dimming point, it will increase the load intensity.

Turning the knob anti-clockwise:

- If the load is off, it will not perform any action.
- If the load is in a specific dimming point, or in the maximum level, it will diminish the load intensity.

Once the load reaches the maximum or minimum intensity level, if we keep turning the knob anti-clockwise or clockwise, the load will continue in its maximum/minimum intensity level.

Rotary LED dimmer

N2260.3 & N2260.8

1. Technical data

Rated voltage / max. power:

- N2260.3: 230 V~ ±10%, 50 Hz / 250 W/VA
230 V~ ±10%, 60 Hz / 200 W/VA
- N2260.8: 127 V~ ±10%, 60 Hz / 140 W/VA
- Room temperature for operation: 0 to 35 °C.

Protection:

- Back-up fuse: Electronic
- Overload protection: Electronic

N2260.3 - Rated min./max. power (230 V~):

- LEDi: 2 W/VA / 100W/VA (max. 10 lamps).
- Dimmable energy saving lamps: 2 W/VA / 100W/VA (máx. 10 lamps).
- LV LEDi with transformer: 4 W/VA / 100W/VA (max. 10 lamps).
- Incandescent lamps: 10 W/VA / 250W/VA.
- Halogen lamps: 10 W/VA / 250W/VA.
- LV halogen lamps with transformer: 10 W/VA / 250W/VA.

N2260.8 - Rated min./max. power (127 V~):

- LEDi: 2 W/VA / 55W/VA (max. 10 lamps).
- Dimmable energy saving lamps: 2 W/VA / 55W/VA (máx. 10 lamps).
- LV LEDi with transformer: 4 W/VA / 55W/VA (max. 10 lamps).
- Incandescent lamps: 10 W/VA / 140W/VA.
- Halogen lamps: 10 W/VA / 140W/VA.
- LV halogen lamps with transformer: 10 W/VA / 140W/VA.

2. Wiring diagram

Standard operation

Operation in a two-way circuit

Warning:

Disconnect the mains power supply prior to installation and/or disassembly! Permit work on the 230V/127V supply system to be performed only by specialist staff.

3. Mounting

Turn the device in the correct installation position. The marks on the back side of the device, orient the correct top position.

4. Set-up

The minimum brightness of the dimmer can be set by adjusting the on the back side of the device..

5. Operation

The LED dimmer is a phase-angle dimmer and is used to switch and dim all lamps listed in "Types of load", especially LEDi loads (LED lamps with an integrated ballast). The LED dimmer serves as light controller in connection with rotary dimmer control elements.

Notes:

1) Use only L or LC transformers. Pure C transformers are not permitted. If transformers are used, the specifications of the respective manufacturers must be observed. In particular, observe the information regarding the minimum load.

Connection load for LEDi

2) Above a connection load of 25 W/VA, suitable measures must be taken to increase the connection load to a maximum of 100 W/VA (230 V supply) or 55 W/VA (127 V supply) when connecting LEDi according to IEC 61000-3-2, for example, through the use of harmonic wave filters.

3) Maximum number of LEDi lamps is 10.

Rotary dimmer 1-10 Vdc for fluorescen or LED drivers

N2260.9

1. Technical data

- Power supply:
230V 50-60Hz 700VA
127V 50-60Hz 350VA
- Load type: Dimmable electronic ballast with 1-10V control input.

2. Assembly/Connection

2.1. Connection

Follow the steps below to install the mechanism:

1. Connect the device according to the connection schemes.
Figure 2 and Figure 3.
2. Assemble the device on the flush mounting box.
3. Then, place the plate.

Figure 1: Installation

Important: Disconnect the power supply when installing.

2. Connection

The fluorescent lighting dimmer N2260.9 may be connected to dimmable electronic ballasts with a control input of 1-10 V as shown in Figure 2:

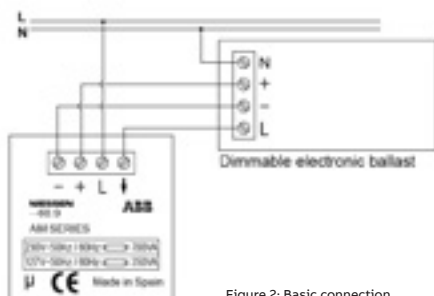

Figure 2: Basic connection

The maximum charge to be connected to the control terminals +/- should not exceed 50 mA.

See technical specifications of the dimmable electronic ballast to be installed.

Electronic ballasts generate a very high instantaneous peak current at connection, therefore it is recommended not to connect more than 6 ballasts to the N2260.9 fluorescence regulator.

In installations where it is required to connect more than 6 electronic ballasts to the same regulator mechanism, it is recommended to use a contactor to protect the mechanism contacts. See Figure 3.

Figure 3: Connection using a contactor

3. Operation button turns in the clockwise direction

If the charge is disconnected, i.e. the rotatory button is completely turned counter-clockwise, when turning right the charge will turn on (a "click" will be heard) and the intensity level will increase as we turn the button in the clockwise direction.

If the charge is at a given point of regulation, the charge intensity will increase as we turn the button in that direction.

If we turn the button completely in the clockwise direction, this will stop in a limit, which will coincide with the maximum regulation intensity level.

Operation button turns in the counter-clockwise direction

Intensity level will reduce as we turn the button in the counter-clockwise direction.

If we turn the button completely in the counter-clockwise direction, a "click" will be heard and the button will stop in a limit, the charge will be disconnected.

1 Module dimmer - N2160.E

1. Technical Data

Voltage:

N2160: 127 V~ ; 60 Hz
N2160.1: 230 V~ ; 50-60 Hz

Power:

N2160: 50-500 W 
N2160.1: 50-700 W 

Operating temperature:

0 – 30° C

Table 1:
Power reduction (%) as a function of temperature (°C)

2. Assembly/Connection

2.1. Assembly

Important:

If the dimmer is installed next to another electronic device that can produce heat, the maximum power must be reduced in half. If it is installed between two electronic devices that can produce heat, the maximum power must be reduced to the fourth.

2.2. Connection

Important:
Disconnect the power supply when installing.

3. Operation

Do not exceed the maximum shown in Table 1, since the dimmer has a NON-resettable thermal fuse. If the fuse is triggered, the electronic dimmer is useless for further use. In case of exceeding the maximum load, the fuse could not trig but it may happen that the load will not turn off.

Push dimmer - N2260

1. Technical Data

Power supply:

127 V~ ; 60 Hz / 230 V~ ; 50 Hz

Minimum power:

40 W / VA

Maximum power:

For 230 V~ ; 50 Hz:

 450 W incandescent lamps.
 400 VA halogen lamps with transformers.

For 127 V~ ; 60 Hz:

 250 W incandescent lamps.
 250 VA halogen lamps with transformers.

Protection against overcurrent:

Using a calibrated fuse ref. T-2A.

Protection against faulty connections:

Using an electronic device.

Regulation time:

from minimum to 3.8 secs.

Nighttime indicator display:

LED.

Temperature for operation:

0 to 30 °C.

Interference suppression:

UNE-21806 and EN 55014 Standards.

3. Mounting:

1. To connect the device, lift the switch (Fig. 3).
2. Connect the dimmer based on the wiring scheme (Figs. 1 and 2).
3. Mount the device on the wall box, and then position the plate.
4. To change the fuse, lift the switch, pulling softly along its edge (Fig. 5) and remove the fuse holder (Fig. 6).

2. Wiring diagram:

Figure 1

Figure 2

The electrical wiring for these devices is performed according to the wiring diagram shown in Figure 1.

The incoming arrow indicates the phase/line wire of the installation and the outgoing arrow indicates the wiring towards the receptor/load according to Figure 1.

The terminal "1" is used to enable the remote control from several points using conventional pushbuttons, refer to the Figure 2.

If the device is to be installed individually, follow the instructions indicated in Figure 1.

This dimmer allows the remote control using conventional auxiliary pushbuttons, making it possible to control the turning on and off and dimming features from different points by means of only one electronic device and any number of conventional pushbuttons as desired. In case it is required to allow control from several points, refer to the Figure 2. Any number of auxiliary conventional pushbuttons may be used as needed. The outputs of these pushbuttons are connected to terminal "1". See Figure 2.

NOTE: Pay special attention to the device input and output conductors, according to the previous description.

Make sure to disconnect the power supply before manipulating the device.

4. Operation:

The operation of the regulator during set up, disconnection or regulation is as follows:

SHORT PULSATION:

If the regulator is off, upon receiving a short pulsation it will turn on using always the maximum level of light.

If the regulator is on, upon receiving a short pulsation it will turn off.

A short pulsation refers to any pulsation lasting between 50 ms and 400 ms.

LONG PULSATION:

If the regulator is off, upon receiving a long pulsation it will turn on using the minimum level of light; then it will increase it until the pulsation stops, or until it reaches the maximum level of light. If the regulator is on, upon receiving a long pulsation the regulation direction will reverse: if the level of light has increased up to a certain point, it will diminish, and vice versa. Whenever the maximum level of light is reached during a long pulsation, the regulation will stop in the maximum level, even if pulsation continues. However, when the minimum level is reached, it does not stop and it starts increasing.

A long pulsation refers to any pulsation lasting for more than 400 ms.

Universal pulsation dimmer - N2260.1

1. Technical data

Electrical data:

- Power supply: 230 V~ ; 50 Hz
- Minimum power: 60 W / VA
- Maximum power:
 - 500 W incandescent lamps.
 - 500 VA halogen lamps with electronic transformer.
 - 400 VA halogen lamps with ferromagnetic transformer.
- Room temperature for operation: 0 to 30 °C.

Features:

- Dimming control by means of a local push button (N2260.1 and N2260.2) and a rotary dimmer (N2260.2).
- Control capability through auxiliary push buttons (N2X04.X).
- LED indicator pilot.

Detecting the type of load

- After wiring the device to the power supply, the dimmer assesses the type of the load connected.

Overload

- If the device overloads above the maximum rated power, or if the operating temperature exceeds the maximum, the regulator will automatically stop working as a safety measure.

Short Circuit

In case of short circuit, the device will stop working as a safety measure.

Note: Disconnect the device from the power supply if you are making changes to the load.

2. Assembly/Connection

2.1. Connection

Important: disconnect the power supply when installing.

Figure 1:
Basic wiring diagram

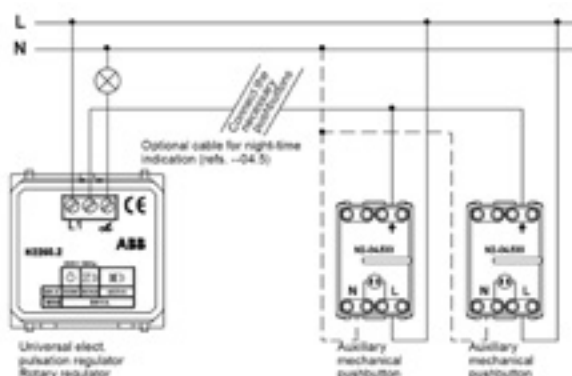

Figure 2: Special wiring diagram

Wiring for direct control

The electrical wiring for these devices is performed according to the wiring diagram shown in Figure 1.

The terminal marked "L" shows the phase wire of the installation.

The terminal indicated with ⌚ represents the conductor wiring terminal returning from the load, which is also connected to the neutral conductor of the installation. See Figure 1.

The terminal marked "1" is used to exercise control from several points by means of conventional push buttons. See Figure 2.

If the device is installed individually, follow the instructions indicated in Figure 1.

Wiring for remote control option

The special characteristics of these dimmers enable the remote control using conventional auxiliary push buttons (N2X04.X), making it possible to control the turning on and off and dimming features from different points using only one electronic dimmer and any number of conventional push buttons as desired.

In case it is required to exercise control from several points, refer to the diagram below. Any number of auxiliary conventional push buttons may be used as needed.

The outputs of these push buttons are connected to terminal "1". See Figure 2.

Note: pay special attention to the device input and output conductors, according to the previous description.

3. Mounting

To install the device follow these steps:

1. Connect the device based on the corresponding wiring scheme. Figure 1 and Figure 2.
2. Mount the device on the wall box.
3. Then, position the plate.

Figure 3: Installation

4. Operation

The operation of the dimmer during the set up, disconnection or regulation is as follows:

Short pulsation

If the dimmer is off, upon receiving a short pulsation it will turn on using always the maximum level of light.

If the dimmer is on, upon receiving a short pulsation it will turn off.

A short pulsation refers to any pulsation lasting between 50 ms and 400 ms.

Long pulsation

If the dimmer is off, upon receiving a long pulsation it will turn on using the minimum level of light. Then it will increase it until the pulsation stops, or until it reaches the maximum level of light.

If the dimmer is on, upon receiving a long pulsation the dimming direction will reverse: if the level of light has increased up to a certain point, it will diminish, and vice versa. Whenever the maximum (or minimum) level of light is reached during a long pulsation, the dimming will stop in the maximum (or minimum) level, even if pulsation continues.

A long pulsation refers to any pulsation lasting for more than 400 ms.

Movement detector - N2241

1. Introduction

This motion detector device senses the movement of people in an area of 5m (maximum) and in a 110° angle. Depending on the level of light detected by the light sensor and the motion detected in the covered area, the device determines if the load connected to it should be activated or not, thus lighting the area in which it is connected whenever someone passes. While it is detecting movement, the device maintains the load activated. When it stops detecting motion it disconnects the loads in the preset time. The device enables remote control through conventional push buttons with the use of only one conductor and thus simplifying electrical installations with the possibility to substitute the traditional switched installations.

2. Technical Characteristics:

Power supply: 230 V~ ; 50 Hz
127 V~ ; 60 Hz

Maximum power:

-  Incandescent lamps: 1,800 W (230 V~ 50 Hz)
1,000 W (127 V~ 60 Hz)
-  Halogen lamps with electronic transformer, or halogen lamps with ferromagnetic transformer:
750 VA (230 V~ ; 50 Hz)
400 VA (127 V~ ; 60 Hz)
-  (M) Fluorescent lamps or motors: 400 VA (230 V~ ; 50 Hz)
200 VA (127 V~ ; 60 Hz)

Voltage free relay output: 2 terminals:

- Control capability through auxiliary push buttons (N2X04.X).
- Timer adjustment: Between 10 sec. and 10 minutes.
- Adjustment of light set point level for detection.
- Room temperature for operation: -10° C to 40° C.
- Detection range of the IR motion sensor: Max. 5 metres in a 110° angle.

Figure 1. Sensor detection diagram

Horizontal view diagram showing the detection area

Front device description

Fig 2.- Front view of the device

1. Detection lens
2. Light sensor
3. Light set point selector
4. Timer selector
5. Operating mode selector
(3 positions):
I – Always on
A – Automatic (central position)
O – Always off
6. Red LED, indicator of automatic operating mode. It does not light when operating in modes I and O.

3. Wiring

Pre-installation recommendations

Install the device away from heat sources or draughts. The sensitivity of this detection device depends on several factors such as temperature, ambient humidity, as well as speed and direction of people's movement. Before installing the device, it is important to determine where to install it so that it adequately covers the desired detection area.

Basic wiring

The electrical wiring of these devices is performed according to the wiring diagram shown in Figure 3. The terminal marked "L" shows the phase wire of the installation. The terminal marked "N" shows the neutral wire of the installation. The terminals marked  represent the two terminals of the relay output (voltage free).

Figure 3: Basic wiring diagram

The terminal marked "aux" (control terminal) is used in case it is desired to control the device (optional) from different points through conventional push buttons (auxiliary pushbuttons). See wiring diagram in Figure 4.

It is possible to use the device as a crepuscular switch if a switch is connected to the control terminal to a pushbutton.

Note: Pay special attention to the device input and output conductors, according to the previous description.

Make sure to disconnect the power supply before manipulating the device.

Figure 4: Special wiring diagram

Wiring of several devices in parallel

The detection area in a zone can be increased by installing more than one motion detector device.

To ensure that the detection of movement by any of the devices installed activates the load controlled by all of them, their outputs should be wired in parallel to the load. See wiring diagram in Figure 5.

Figure 5: Parallel wiring diagram

Selection of the light and time threshold

Once the device is wired and installed, based on the type of application, it is important to determine the light value below which the device should activate the load while in Automatic Mode, either by the detection of movement or by pressing the auxiliary pushbutton.

The light set point selector (see Figure 6) enables the selection of the light threshold below which the detector will activate the load.

- If the potentiometer is turned to the left (anti-clockwise), the device will activate the load whenever it detects movement, regardless of the light value, during either day or night.

-If, on the contrary, the potentiometer is turned to the right (clockwise), the device will activate the load when it detects movements under low light conditions, i.e. almost in the dark.

Movement detector - N2241

Figure 6: Exploded view of the selection potentiometers for the selection of light and time thresholds.

The load disconnection time is another important parameter that needs to be chosen. The set value will be based primarily on the type of application and the detector installed. The time can be chosen easily by turning the time selector potentiometer (see Figure 6).

4. Installation

To install the device follow these steps:

1. Connect the device based on the wiring scheme. Figures 3, 4 and 5.
2. Mount the device on the wall box.
3. Then, position the plate.

Figure 7: Installation for N2241

The load disconnection time is another important parameter that needs to be chosen. The set value will be based primarily on the type of application and the area in which the detector is installed. The time can be chosen easily by turning the time selector potentiometer (see Figure 6).

5. Operation

The motion detector device has 3 different operating modes that the user can select at any time using the selector located at the front of the device.

The available operating modes are the following:

- I – Always on
- A – Automatic (central position)
- O – Always off

Operating Mode "I": Always On

How to select the operating mode "Always On"

- The operating selector is in position I: Always On
- The front red pilot is off

In this operating mode, the load is always activated, regardless of the light

level or the movement detected within the covered area.

While in this mode, the device does not respond to the auxiliary push button that may be connected to the control terminal.

Operating Mode: Automatic (A). Motion detector.

How to select the operating mode "Automatic"

- The operating selector is in position A: Automatic.
- The device indicates it is in the Automatic operating mode by lighting the front red pilot.
- Optionally, the auxiliary push buttons wired to the control terminal can be used.

This operating mode enables the independent activation and deactivation of the load, based on the movement detected within the covered area and on whether the light level is above or below the set threshold.

When the device detects movement of people and the light level sensed is below the set point, then it activates the load. With the conditions described above and while the device detects movement, the load will be activated.

Once the device stops detecting movement, it will deactivate the load based on the time set for deactivation; in this way, the device will be on standby until it detects another movement within the covered area.

When one of the auxiliary push buttons that may be connected to the control terminal is pushed, the device will behave as if it had detected movement. It will activate the load whenever the light level in the covered area is below the set point and will deactivate the load if no movement is detected within the time set.

Operation as Crepuscular Switch

The device can be operated as a crepuscular switch, i.e. it can activate the load when the light level is below the set threshold, no matter if there are people moving in the area or not. In the same way, the device may deactivate the load when the light level goes above the selected threshold.

How to select the operating mode "Automatic" when the device works as a crepuscular switch.

- The operating selector is in position A: Automatic
- The device indicates it is in the Automatic operating mode by lighting the front red pilot.
- Instead of using auxiliary push buttons, wire a switch to the control terminal and then, wire the terminal to the phase wire. When the switch is closed, the device operates as a crepuscular switch.

This operating mode is a well defined application derived from the device Automatic operating mode. In this mode, the device operates as a crepuscular switch, so that when the front light sensor detects a decrease in the light level below the set threshold, the switch activates the load, regardless whether there is movement of people or not within the covered area.

Once the light in the room collected by the sensor exceeds the set light threshold, it disconnects the load.

Note 1: For the correct operation of the device as a crepuscular switch, the device should be kept away from the light source (load) it controls. In this way, the purpose is that the device's light sensor only collects the room light (not artificial) that will determine if the light loads automatically controlled by the device should be turned on or off.

Note 2: This operating mode automatically decides whether to connect or disconnect the loads, based solely on the light collected by the device's light sensor. Therefore, the operation of the device does not rely on or respond to the movement of people within the covered area, if the switch connected to the control terminal is closed to the phase wire.

Time delay switch

N2262.1

1. Technical data

- Rated Voltage: 230 V~ ; 50 Hz

- Maximum power:

☀ 40 - 500 W for incandescent lamps.

⚡ 40 - 400 VA for halogens with conventional transformers.

Ⓜ 40 - 100 VA for motors.

Protection against overcurrents:

Through calibrated fuse F-3,15H. It is supplied with a replacement.

Protection against faulty connections:

Through electronic device.

Time delay: from 10 sec. to 10 min. ($\pm 10\%$).

Night vision device: red LED.

Operating temperature: from 0 to 40 °C.

2. Wiring diagram:

The electric connection of these articles is carried out in conformity with the presentation of the following Figures. The «L» terminal indicates the connection with the installation phase wire, and the arrow exiting the device indicates the connection to the receptor.

Fig. 1

Fig. 2

NOTE:

Pay particular attention to the connection of exit/entry device conductors, as shown in the diagrams.

When manipulating the device, make sure it is disconnected from the power grid.

For the applications requiring the timing of an engine of less than 40VA power, for example a small air-extractor engine with 13VA in a bathroom, the connection will be possible if you connect another load to the latter, so as to make sure the addition of both power loads results in a power output which is greater than 40VA, the minimum load required for the correct operation of the device.

If an engine is connected to another load (a halogen or incandescent lamp), the maximum power load of the latter has to equal the maximum power output value of the engine.

3. Mounting:

Fig. 3

1. Connect the device according to the instructions cited in the subsection on connection grid systems. Do not manipulate the device when connected to the power grid.
2. Introduce the mechanism in the flush-mounting box holding it with the screws of the box (or with fixation claws, if the box is equipped with them).
3. Set the time delay.
4. Mount the frame.
5. When mounting the other series, insert the frame between the support and the body and screw the support to the body. Mount the key on the support.
6. The time delayed switch is ready to use.

4. Operation:

The time delayed switch is an electronic operation mechanism making the automatic disconnection of the controlled element, within an adjustable time interval.

The manual operation is carried out by pressing the key.

Setting the desired time margin for disconnecting the device, is carried out by using an adjusting screw, as indicated on Figure 4. The time range is adjustable from 10 seconds to 10 minutes ($\pm 10\%$).

Fig. 4

Rotatory thermostat with remote sensor

N2240.3

1. Technical data

Voltage: 230V~ +/-10% 50-60Hz

Load power: 2.300W.

Load type: floor heating resistor.

Control temperature: +5°C to +45°C (Set point).

OFF state: at OFF position, the thermostat is off, so that it does not address the temperature measured by the floor temperature probe. The relay output contact is open.

Temperature accuracy: 0,5°C.

Hysteresis: 0,5°C.

Floor temperature sensor: NTC, 10KΩ at 25°C, -40°C to 80°C.
Double isolated cable, 4m length.

LED light indication: red and green

Ambient temperature: -20°C to 45°C

2. Wiring diagram:

In order to get the better temperature measurement performance possible at the floor thermostat installation, it is recommended:

- Install the thermostat higher than 1m height from the floor.
- Do not install the thermostat near other heat or cold sources.
- Keep the floor temperature sensor away from interference sources or power circuits.
- Check the floor temperature sensor is correctly connected.

Important: Disconnect the mains voltage power when installing.

Work on the 230 V supply system may only be performed by specialist staff!

Disconnect main power supply prior to installation and/or disassembly!

3. Mounting

4. Operation:

The temperature set point can be adjusted by the rotary knob on the front of the thermostat, from +5°C to +45°C.

LED light in the front, indicates the following:

- Red color: Temperature set point is higher than measured temperature at floor sensor. Relay output contact is closed.
- Green color: Temperature set point is lower than measured temperature at floor sensor. Relay output contact is open.
- LED off: Thermostat is OFF state (disconnected).
- Blinking red color: (a) The floor temperature sensor would not be connected or (b) the temperature read by the floor temperature sensor is below.
- 40°C. Relay output contact is closed.

Digital thermostat

8140.5 + N2240.5

1. Technical data

Voltage: 230 V~ ; 50 - 60 Hz

Power consumption: < 1W

Control temperature: +0°C to +50°C

Temperature accuracy: ±2°C (±1°C with calibration)

Resolution: 0,1°C

Control output: potential-free relay contacts (NA).

Maximum load: 3A cos φ = 0,5.

Hysteresis: 0,5°C

Pulse-width modulation: ±4°C difference with the set-point temperature, variable from 100% to 0% modulation.

2. Wiring diagram:

For heating or cooling installations
WITHOUT potential free input

For heating or cooling installations
WITH potential free input

Important: Disconnect the mains voltage power when installing. Work on the 230 V supply system may only be performed by specialist staff! Disconnect main power supply prior to installation and/or disassembly!

3. Mounting

1. Mounting plate
2. Insert - 8140.5
3. Cover plate - N2240.5
4. Frame

4. Operation:

This command allows you to control heating and cooling devices (not simultaneously) from its internal electronic thermostat. Also, thanks to the night mode, allows to maintain a temperature differential (from 0°C to 5°C, also programmable) to save energy with just one keystroke.

Night operating mode C :

It is based on setting a temperature difference (in °C) between day and night, in order to save energy.

Winter mode ❄️ :

To be selected when the equipment under control is a heating equipment.

Summer mode ☀️ :

To be selected when the equipment under control is an air-conditioning equipment.

Temperature control by hysteresis:

Thermostat's default type of control. The use of hysteresis control is particularly suitable for gas boilers.

Pulse-width temperature control:

The use of pulse-width control is particularly recommended for electric heaters, heat pumps or electrothermal actuators.

ATTENTION:

To select between hysteresis and pulse-width, it is necessary that the thermostat is off mode, i.e. the "ON" is not displayed on the screen.

(1) TEMPERATURE DISPLAY

Displays the set-point temperature.

(2) PUSH BUTTON FOR CONFIRMATION OF SELECTED OPTIONS

Confirms the selected values.

(3) ON/OFF AND UP PUSH BUTTON

Turns the control on and off. The display will show "ON" if it is turned on and will turn off when it is off. It serves to increase the temperature displayed on screen.

(4) NIGHT AND DOWN KEY PUSH BUTTON

Selects between day and night modes. The display will show C in night mode and in day mode it will disappear. It serves to decrease the temperature displayed on screen.

(5) FUNCTIONS/CONFIGURATION SELECTOR

By pressing "we will adjust the set-point temperature" and, if we press successively, we will choose "winter/summer", "night temperature", "thermometer calibration" and "output relay action mode".

- 1 press on "MODE" to adjust the set-point temperature.

While the set-point temperature and the symbol "°C" flash on the display, set the desired value with "▲ and ▼" and press "OK".

- 2 presses on "MODE" to choose between winter and summer.

While the symbols ❄️ / ☀️ flash on the display, set the desired value with "▲ and ▼" and press "OK".

- 3 presses on "MODE" to choose the night temperature differential.

While the night temperature differential and the symbol C flash on the display, set the desired value with "▲ and ▼" and press "OK".

- 4 presses on "MODE" to calibrate the thermometer.

The temperature indicator flashes and with "▲ y ▼" we select the appropriate ambient temperature. It will be set by pressing "OK".

- 5 presses on "MODE" to choose the "output relay action mode". The "STD" or "INC" will be illuminated on the display when pressing "▲ or ▼". We select the right one and we press "OK".

"STD" indicates the operating mode by hysteresis.

"INC" indicates the operating mode by pulse-width modulation.

In all the cases the setting is validated pressing "OK". Failure to do so, the control returns to the previous settings in 5 seconds without saving the new ones.

With the control turned off, it behaves as a thermometer, showing the current temperature.

ATTENTION:

In the first implementation it is advised to wait **8 hours** before calibration. After an off voltage, the control requires **30 minutes** before showing an accurate temperature.

Rotatory fan control

N2254.1

1. Technical data

Voltage: 127 V~ ; 60 Hz

Load power: 190 W

Load type: ceiling fan.

Operating temperature: +0°C to +40°C

2. Wiring diagram:

3. Mounting:

4. Operation:

Speed / Button position: 0 Disconnected.

I Maximum speed.

II Medium speed.

III Minimum speed.

Important: Disconnect the mains voltage power when installing.
Work on the power supply system may only be performed by specialist staff!
Disconnect main power supply prior to installation and/or disassembly!

Electronic doorbell

N2224 & N2224.1

1. Technical data

Voltage:

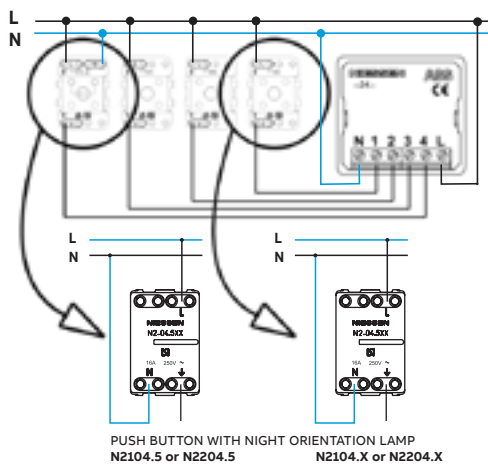

- N2224: 230 V~ ; 50-60 Hz

- N2224.1: 127V~ 60Hz

4 melodies available.

Acoustic power at 1 meter with cover plate: 72 dB.

2. Wiring diagram:

Connection with more than one push-button per melody.

3. Mounting

To install the device follow these steps:

1. Connect the device based on the corresponding wiring scheme.

2. Mount the device on the wall box.

3. Then, position the plate.

4. Operation:

The bell can be connected to 4 push buttons maximum, with a different melody for each one of them.

Important: Disconnect the mains voltage power when installing.
Work on the power supply system may only be performed by specialist staff!
Disconnect main power supply prior to installation and/or disassembly!

Buzzer

N2119 & N2219

1. Technical data

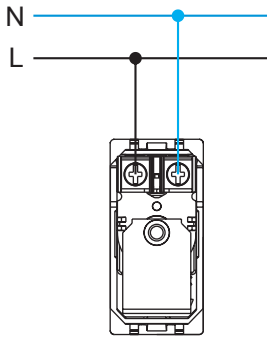

Rated voltage: 127-230 Vac / 50-60 Hz.

Rated power: 8 VA.

Adjustable tone.

Acoustic power at 1 meter with cover plate: 75 dB.

2. Wiring diagram:

LED signaling light

N2180 BL/RJ/VD, N2180.1 BL, N2280 BL & N2280.2 RJ/VD

1. Technical data

Rated voltage: 127-230 Vac / 50-60 Hz.

Lamp:

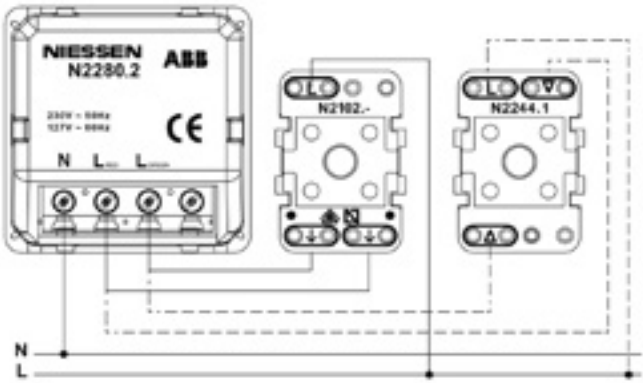

- N2180 BL/RJ/VD / N2180.1 BL / N2280 BL: white LED.
- N2280.2 RJ/VD: red and green LED.

Luminous flux:

- N2180 BL/RJ/VD / N2280 BL / N2280.2 RJ/VD: > 2 lumen at 1 meter.
- N2180.1: < 0,5 lumen at 0,3 meter.

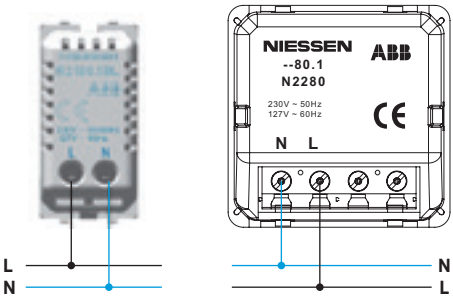

Diffuser:

- N2180 BL / N2180.1 BL / N2280 BL / N2280.2 RJ/VD: white.
- N2180 RJ: red.
- N2180 VD: green.

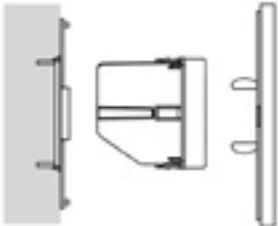

Important: Disconnect the mains voltage power when installing. Work on the power supply system may only be performed by specialist staff! Disconnect main power supply prior to installation and/or disassembly!

2. Wiring diagram:

3. Mounting:

LED beacon light

N2281

1. Technical data

Rated voltage: 230V~, 50-60Hz (optional 127 Vac version available)

Alert signals: it can be selected by the selector:

- (a) - blue color light or
- (b) - high brightness white light

Autonomy: 2 hours; 1h at maximum illumination and 1h at lower illumination.

Remote control: supports any standard remote control over voltages.

Standard: UNE-EN60598-2-22 Interference suppression according to norms UNE-21806 y EN-55014.

Brightness: more than 2 lumens (lm) at 1 meter distance.
Battery Nicks-Metal Hydride (Ni-MH), with less environmental impact.

Note: Ni-MH batteries have an estimated life of 4 years. Beacon Pilots correct operation should be verified periodically. In the absence of voltage and previously to have been connected to voltage for more than 24 hours, the mechanism should provide a minimum of one hour beacon lighting, if not, replace the mechanism.

2. Wiring diagram:

3. Mounting:

4. Operation:

The stairs beacon pilot is an autonomous signaling device, equipped with an electric energy storage battery, which ensures the correct building pathways signaling lighting in the event of a power outage or when it drops below 70% of its nominal value (230V~).

Once connected to mains voltage the device can remain in the following operation situations:

- (1) Alert (signaling)
- (2) Operation (beacon)
- (3) Standby (remote control)

Alert (signaling)

The device remains on alert (signaling), provided that the value of the power supply exceeds 70% of the power supply nominal voltage (230V~ 50-60HZ).

Emergency operation

It comes into an emergency operating condition when the power supply voltage is less than 70% of rated voltage (230V~ +/-10%). The device is illuminated with high brightness white color.

Note: The time necessary to recharge the device batteries is 24 hours.

Standby (remote control)

Situation in which the device remains off, even when the power supply voltage is interrupted. This action is achieved by using a remote control connected to the equipment, as shown in figure "Device connection".

This way you can select certain number of appliances, from the total installed drivers, to remain off in a power failure, thereby reserving the batteries charge in case of a possible need for further use if the power outage is prolonged.

This is achieved by acting on the remote control that generates a continuous control signal or low voltage pulses, which acts on the pilot/s by placing it/them at standby or running again (beacon), as desired.

When achieving this type of installation, make sure of the correct connection of the different drivers.

Select the color of the device signaling light in alert situation (signaling).

No need to disconnect the supply voltage of the device to select the alert light through the potentiometer. Although the remote control inputs were connected, these should not be active at the time of selecting the alert light through the potentiometer.

Important: Disconnect the mains voltage power when installing.

Work on the power supply system may only be performed by specialist staff!
Disconnect main power supply prior to installation and/or disassembly!

Make Up Room / Do Not Disturb system

N2180.4, N2180.5 & N2244.5

Zenit elastic claws

Mounting the claws on the metal mounting plate

The elastic claws are inserted into the metal support of the mechanisms. For this, there is a guide where at the end of the path the claws are clipped and are perfectly secured, making a block with the mounting plate.

Once the claws are assembled, place the screwdriver in the mounting plate to level it and mount it correctly in the box.

The assembly is pressed into the housing.

The system is effectively fixed without the need for any additional elements. It supports the stresses to which the elements inserted in the ring can be subjected, in their habitual use. (insertion of plugs, rocker pressing, etc.)

Insertion of a 1-module mechanism in a mountin plate with elastic claws.

- 1- Insert the additional parts (elastic claw insert ref. N2071.8).
- 2- Insert the 1-module mechanism into the metal bracket.

Removing the mounting plate and claws from the box

In order to be able to disassemble the entire set, simply insert a tool (screwdriver) and press on each of the claws until they are released from the mechanism support, they fall into the inside of the box and it is now possible to remove all the system. To reassemble it you have to restart the whole process explained before.

Zenit sound system

A soundtrack in each space

FM stereo receiver with alarm module

9368

1. Technical data

Rated voltage:
 - 9368: 230 V~, ±15%; 50-60 Hz
 - 9368.7: 127 V~, ±15%; 50-60 Hz

Max. consumption: 100 mA

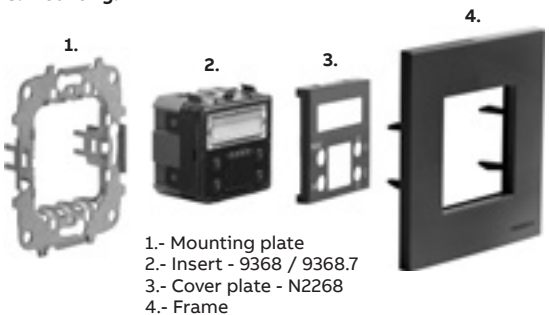

Stand-by consumption ref. 9368 and 9368.7 (*): 0,2 W.

Stand-by consumption ref. (9368 or 9368.7) + 9368.3 (*): 0,5 W.
 (*) With the display illumination at minimum.

Maximum output power: 2+2 W; <1% distortion (16 W)

Speaker impedance: 16 W (2+2 W audio)

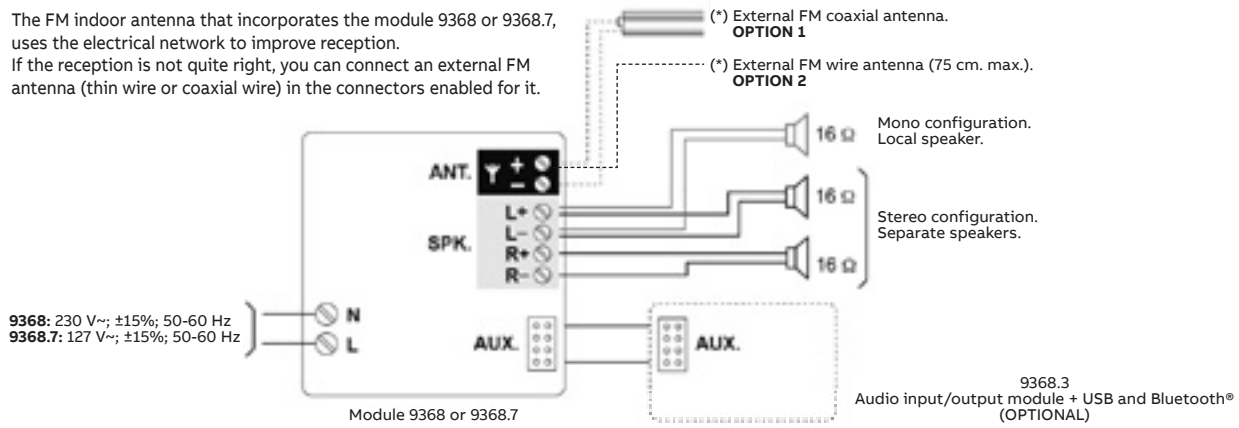

3. Mounting:

1.- Mounting plate
 2.- Insert - 9368 / 9368.7
 3.- Cover plate - N2268
 4.- Frame

2. Wiring diagram:

(*) FM RECEPTION
 The FM indoor antenna that incorporates the module 9368 or 9368.7, uses the electrical network to improve reception. If the reception is not quite right, you can connect an external FM antenna (thin wire or coaxial wire) in the connectors enabled for it.

(*) External FM coaxial antenna.
OPTION 1

(*) External FM wire antenna (75 cm. max.).
OPTION 2

16 Ω Mono configuration. Local speaker.
 16 Ω Stereo configuration. Separate speakers.
 16 Ω

9368: 230 V~, ±15%; 50-60 Hz
 9368.7: 127 V~, ±15%; 50-60 Hz

Zenit Centralizations and Workstations

Cutting-edge connectivity

Surface and flush-mounted Centralizations

1. For the mounting of the surface and flush mounting boxes, please check the diagrams for the Workstations in the next page.

2. Both in the surface solution and in the flush solution, there are metal mounting plates where the mechanisms are inserted.

3. The mechanisms are inserted in the mounting plate by pressure.

4. Once inserted, proceed with the wiring.

5. The mounting plate is closed by clipping.

6. Once all the devices are wired and the mounting plates correctly placed, the frame is mounted by clipping it to the box.
