LED inverter

LED inverter er et nødforsyningsenhed med høj ydeevne og stor fleksibilitet. LED inverter er egnet til konstruktion eller ombygning af almen armaturer med LED som panikbelysning i standby eller kontinuerligt kredsløb. Enheden kan monteres i en IP65 konsol ved behov for høj tæthedsklasse. LED inverter kan kobles sammen med Logica visualiserings software.

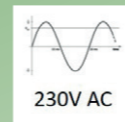

Anvendelses muligheder:

Generelt

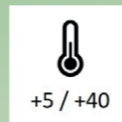

Selvforsynende

230V AC

LiFePO4

+5 / +40

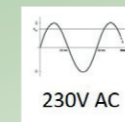

20 timer

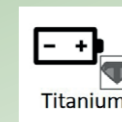

1 time

Selvforsynende variant

230V AC

Titanium

-20 / +50

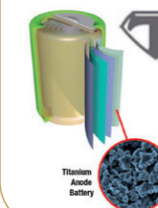

4 timer

1 time

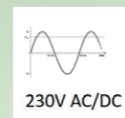

10 års garanti med Titanium batteri

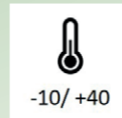

- ♦ Hurtig opladning: Kun 4 timer.
- ♦ Ekstrem driftstemperatur: -20 til +50 grader.
- ♦ Lang levetid: 7.000 opladninger
- ♦ Pålidelighed: Reagerer ikke ved kortslutning eller lignende.
