

POHL DURANIZE® COLOR CHART

With POHL Duranize®, the top layer of the aluminum is anodized and forms an extremely hard, scratch-resistant and durable surface that requires little maintenance. POHL Duranize® is available in all standard anodized colors. In addition, we have developed special anodized finishes for you.

Disclaimer:
The colour illustrations serve as examples. Deviations in colour are possible and do not constitute a reason for complaint. Only agreed reference samples are binding.
